

ABANDONS CARGO OF BOOZE IN CAR

Driver of Machine Which Hit Truck
Here Leaves 96 Quarts of Whis-
key West of City.

RADIATOR SPRINGS A LEAK.

Telephone Inquiry From Indianapo-
lis About "Stolen" Car Leads
Prosecutor to Investigate.

The driver of the automobile who ran into the rear of the Pinnell-Tompkins truck at the corner of Main and Second streets yesterday afternoon at 4 o'clock, had a cargo of booze aboard, which was later abandoned near the Carr farm west of Rushville. The hood and radiator cap of the machine were ripped off when it came in contact with the truck and the radiator was damaged. This did not stop the driver, however, for he did not even hesitate, but proceeded on down Second street as fast as the car would carry him.

After the radiator sprung a leak, it was not possible for the driver to go very far as the engine became overheated. He ripped the license plates from the machine and it was said by residents of that neighborhood that he got into another car and went on to Indianapolis, leaving the booze and machine to its fate. Upon examination of the car it was discovered that there were 96 quarts of whiskey, in addition to 12 quarts of beer, in the machine. The wholesale value of the whiskey is estimated at \$250. It was packed in eight grain sacks.

Last night a long distance phone call came into the police station for Chief of Police Seward. Marshal Newhouse answered the call and the man at the other end of the wire said that his name was Jack Wright of Indianapolis and that he had been informed that his car, which had been stolen, was being held by the police of this city. Prosecutor Stevens was called to the phone and Wright told the prosecutor that the car had been stolen Wednesday morning. He said that someone had informed him by telephone that the car was here, when asked how he knew the car was being held. The prosecutor said that he was going to Indianapolis this morning and if Mr. Wright would meet him at the terminal, they would talk the matter over, to which Mr. Wright agreed.

An investigation showed that no one from this city had sent a call to Indianapolis for Mr. Wright and this morning when the prosecutor left for Indianapolis, he had papers filled out for his arrest, and it was thought that he would return with the man he was looking for.

The first thought of persons who saw the accident yesterday evening, was that the machine was loaded with liquor, else the driver would have stopped for the hood and radiator cap.

The machine was going west in Second street and the truck north in Main street. The truck had not cleared the crossing of Second street when the driver of the light five-passenger car started across Main street. The front end of the machine was wedged up under the rear end of the bed of the truck, which pulled off the hood and radiator cap. The collision happened so quickly that the automobile was barely brought to a stop, and just as soon as it was released from the rear of the truck, the driver sped on down second street, leaving a streak of water which was leaking from the radiator. It was believed that he would not be able to go far with no water.

BUYS AMERICAN COAL

Rome, Mar. 28.—The Italian mission today accepted America's offer of three million tons of coal at \$25 a ton, to be delivered within six months.

TO BEGIN WRECKING APR. 7

Contractor Hopes to Have New
Building Finished in June

The work of wrecking the old buildings occupied by Daniels barber shop and Caron's candy kitchen will probably be started Monday week. The owners contemplate erecting a modern two story building with Bedford stone front similar to that of the Rushville National bank. The upstairs will be fitted up with offices with every modern convenience and the entire building will be heated by steam. E. L. Kennedy is the contractor, and he expects to have the building ready for occupancy by the middle of June.

IDENTITY OF DEAD WOMAN IS MYSTERY

No One Can be Found in Southern
Rush County Who Knows Elva
Dickerson, A Suicide

TAKES LIFE IN INDIANAPOLIS

Addresses Note to Rushville, R. R.
1, Box 47, Saying That She
Was Tired of Living

(By United Press.)

Indianapolis, Mar. 28.—Tired of living, Elva Dickerson, 25, committed suicide by taking carbolic acid in the woman's rest room at the Traction Terminal building today. Her body was found by the matron at the station who thought the woman was asleep. Dr. Paul Robinson, coroner, discovered a note in the girl's pocketbook which reads: "Rushville, rural route, Box 47. I am tired of living and I am going to take this poison. Elva Dickerson."

No one can be found in southern Rush county who knows Elva Dickerson, the young woman reported in the above dispatch to have committed suicide in Indianapolis today.

James Moore, mail carrier on rural route No. 1, of this city, said this morning that Box 47 belonged to Dick Gwinnup, living south of New Salem. The Gwinnup home was called by telephone, but it was stated their mail box number was 36. Furthermore, the person at Gwinnup's home who talked over the telephone said that Miss Dickerson was not known in that neighborhood.

Counting Gwinnup's box number as 36, No. 47 should be Edgar Martin's, but a telephone call to Martin's home this afternoon failed to throw any light on the mystery surrounding the identity of Miss Dickerson. Telephone operators at New Salem do not know her.

The mail carrier is certain that Box 47 is some place in the vicinity of New Salem. No explanation could be found for Miss Dickerson addressing the note to this address when no one in the vicinity knew her.

This afternoon's edition of the Indianapolis News says that Miss Dickerson died within fifteen minutes after attaches of the state found her. Mrs. Anna Veach, matron at the station, told the coroner according to the News, that she saw the young woman sitting on a bench in the basement and thought she had fallen asleep. She said she attempted to arouse her and then noticed the odor of acid. Mrs. Veach summoned Dr. Norman E. Jones, who has an office in the building, but the girl died shortly after his arrival.

The bottle, which had contained the poison, was found in her purse with the note attached to it.

Mrs. Mary DeLoyht, Indianapolis, said she was in the basement when the young woman came in, but did not see her take the poison.

BOLSHEVIKS ENTER AMENDMENTS TO EASTERN GALICIA BE MADE TO DRAFT

Advance of Russian Forces is so
Rapid That Austria is Threat-
ened, Berne Advises Say

UPRISING GAINS HEADWAY

Premier Lenine Urges Hungarian
Soviet to Send a Bolshevik
Army Against Vienna

(By United Press.)

London, Mar. 28.—The British government will report Russian Bolsheviks to Odessa in April, it was announced today.

Paris, Mar. 28.—A French newspaper today sent its rumor that Premier Lenine and War Minister Trotsky have sent a note to the United States asking that this country recognize the Russian Bolshevik government.

Berne, Mar. 28.—Russian Bolshevik forces, penetrating eastern Galicia, are advancing so rapidly that Austria is threatened, according to advices today. The important oil region of Galicia is said to have been completely occupied.

Zurich, Mar. 28.—Seven thousand Italian troops have occupied Stuhl-Weissenburg, 35 miles southeast of Budapest and Raab, 67 miles northwest, taking over a part of the Vienna-Budapest railway, according to dispatches received here today.

Two Roumanian army corps are said to have crossed the frontier of eastern Galicia.

Paris, Mar. 28.—Revolutionary troops in Bessarabia and Ukraina are joining the Russian forces, according to advices received here today.

The workmen and soldiers council in Lemberg are said to be proclaiming a revolution, effective throughout Galicia.

Copenhagen, Mar. 28.—War Minister Trotsky has announced in a wireless statement that the Soviet revolution in Galicia is gaining headway, a Vienna dispatch reported today.

The uprising started 40 miles southwest of Lemberg, the statement said, and is spreading rapidly. Polish troops in Lemberg are alleged to have joined the revolution and declared a general strike.

Berlin, Mar. 28.—Premier Lenine has wired the Hungarian Soviet government urging that it send a Bolshevik army against Vienna, according to dispatches received from Budapest today. He is said to have promised to finance a Hungarian expedition against Austria to the extent of \$20,000,000.

Discovering that Spartacans planned to arm several thousand imprisoned Russians tomorrow, Americans rushed the prisoners aboard trains and are scattering them in prison camps throughout Germany in charge of America.

Radicals in other parts of Germany have begun to take matters into their own hands. In Wurtemberg they have declared a general strike to force the government to accept socialization of industries. Leipzig is said to be under the dictatorship of five communists. The Bavarian government has ordered factories in that state to begin production on a communistic basis.

TO TRY LUDENDORFF

(By United Press.)

Berlin, March 28.—The national assembly has established a supreme court to try General Ludendorff, former Chancellor Von Bethman-Hollweg and other officers alleged to be responsible for the war, a dispatch from Weimar reported today.

Will Cover Monroe Doctrine, Claims
For Racial Equalities and More
Military Guarantees

SCOPE OF PACT UNSETTLED

Whether it Shall be With Germany
or All Allied Enemies Rests
With "Big Four"

(By United Press.)

Paris, Mar. 28.—The French assembly unanimously passed a resolution today declaring that integral reparation and damages must be demanded from Germany and that all German criminals should be punished.

Paris, Mar. 28.—The allies, it was reported today, have decided to give the Roumanian army all necessary equipment to establish it on a firm basis. At the same time the Baltic and Black sea frontiers have been reorganized and the inter-allied high command is taking it in hands in operation against the Bolsheviks in these regions.

Paris, Mar. 28.—The revised covenant of the league of nations will be presented to the league commission with three important amendments still in abeyance, it developed today.

These amendments cover the Monroe Doctrine, Japanese claims for racial equalities and France's recommendation for greater guarantees of military securities.

Delay in the presentation of the Monroe Doctrine amendment is understood to have been due to information that other nations will take the opportunity to draw clauses covering similar acceptances.

Whether the first treaty will be with Germany and Austria or for all the enemy powers probably will depend upon developments in the "Big Four" conference, it was learned today.

The French have added their disapproval to that of the British to the quadruple treaty ideas. Both the French and the British think it might be possible to include Austria in the first treaty without much difficulty, but inclusion of Bulgaria and Turkey would mean additional delay.

The reparation committee is understood to have made the best progress this week of any period since the beginning of their work. It is said that it is to the stage where actual amounts to be received by the various allied countries is being discussed on the basis of what Germany is able to pay instead of what each country is entitled to.

Secretary Lansing, Foreign Minister Sonnino, Foreign Secretary Balfour and French Minister Pichon are now holding a meeting similar to those of the "Big Four" in an effort to make additional speed toward reaching a peace settlement.

The league of nations constitution, which is now in the hands of a special drafting committee, is expected to be completed shortly.

This committee is under restrictions to frame the form of the covenant. It can not add to or take away from the substance.

President Wilson, it was announced, is free to bring up his Monroe Doctrine when the league committee meets again to receive the draft.

At the last session of the league committee, it was learned, a clause was inserted making it clear that mandates must be voluntary. Provision was also made for opening of the officials of the league to the women as well as the men. In regard to the withdrawal of a nation from the league, it must give a two years notice.

BOARD MAKES GOOD SHOW

Is Among The First To Send Draft
Reports

The local draft board received a bulletin yesterday from the selective service division reporting the record made by each board in filing away their records and shipping them in to the war department. Rush county was the 14th board to report their records crated, 19th to report their records shipped, 8th to report the office of the draft board closed and 24th to report the sale of all government property in their possession. Decatur county held the highest record in the state having been the first county to report at three different times. On the other occasion she was well toward the front, reporting in the 12th place.

5 CONTRACTS TO BE LET TOMORROW

Commissioners Will Receive Bids
For Two Cement Highways and
Three to be Built of Stone

MORE PETITIONS CIRCULATED

Three of Them Will Seek to Have
Roads From Here to Henry
County Line Paved

The commissioners will receive bids on five highways, two of which will be cement, tomorrow afternoon at two o'clock. These will be the first road contracts let since shortly after the war began, when road construction was curtailed.

The contracts to be awarded are for the John G. Beale road in Rushville township and the Willard Tribbey road in Posey township, both of which are to be cement; the Chester Cross road in Jackson township, the William T. Moore road in Richland township and the Fred McManus road on the Jackson-Center township line, all of which are to be constructed of crushed stone. These roads are to be built under the three-mile road law.

More petitions are being prepared for roads under the new county unit law. At least three more are being circulated for cement highways from Rushville to the Henry county line, each following a different route than the one filed by Voorhees Cavitt and others last Monday.

Two of the petitions which will be filed, call for the cementing of the road beginning at the end of the Frank Green et al cement highway, northeast of the city, and winding around through the north-eastern part of the county until they reach the county line. One of the routes is through Mays and the other through Raleigh, touching the county line at Lewisville. It is claimed by the farmers circulating each of these petitions that their routes are the shortest to New-castle.

The third petition which will be presented is for a road which begins at the Jackson township line where the John H. Powers cement road will leave off, runs north to the north end of Hal Green's farm, jogs east a short distance and thence north to the county line without passing through Mays.

It is also reported that a petition is being circulated in Orange township to join up the Lafayette Peck pike, which has not yet been built, with the Milroy pike.

ONE KILLED; SIX HURT

Terre Haute, Ind., Mar. 28.—One woman was killed and 6 persons were hurt here last night when a South Seventh street car crashed into an automobile, which was driven by John M. Manson, secretary of the Deep Vein Coal Company of this city.

WHIPPET TANK TO BE SEEN HERE

One of Three to Four State in In-
terest of Victory Loan Coming
to Rushville April 18

TO TRAVEL UNDER OWN POWER

Jackies Band and Airplane, if Suit-
able Field Can be Found, Are
Also Promised County

Loan Workers To Meet.

A meeting of township Victory Liberty Loan workers, both men and women, has been called for the court house at two o'clock next Tuesday afternoon to arrange for the campaign which opens April 21. The first-advertising for the campaign, the "teaser posters," has been received here and was being distributed today. The poster is a big "V" on a background of red, 20 by 30 inches in size.

With whippet tanks crawling from county seat to county seat, and in full battle array, with airplanes soaring over-head, with the Jackies band entour and with men in khaki explaining that "the job is not over" until the last debt has been paid, and the last soldier brought home, and the government's slate of obligations wiped clean, Indiana will take on a truly military atmosphere during the next thirty days. These features have been planned in connection with the Victory loan campaign and will, weather permitting, be staged during the month of April.

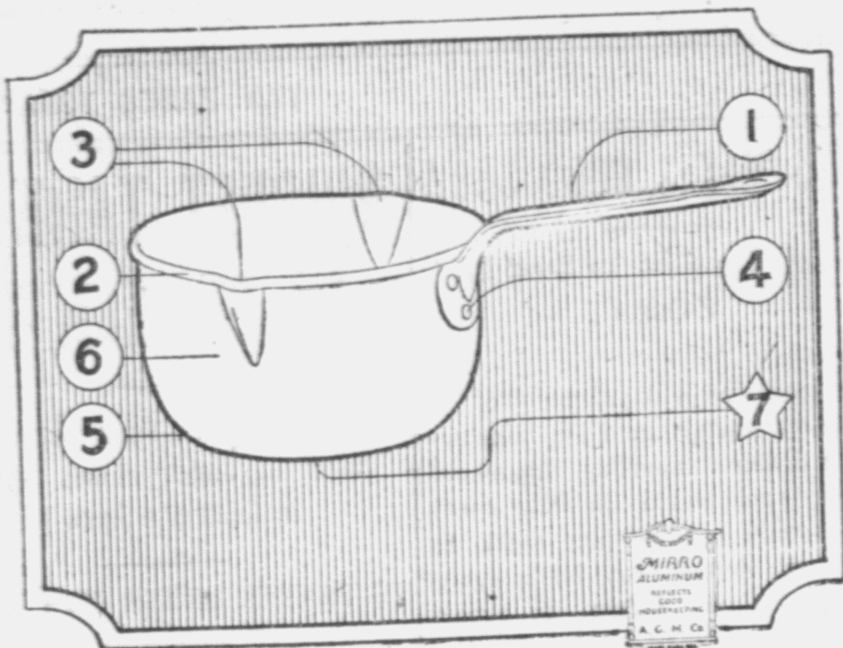

State headquarters of the Victory loan drive is busily engaged in making schedules and itineraries, ascertaining where flying fields, exhibition space and gasoline may be obtained, and in being assured that there is not a city, town, hamlet or even cross roads in the state where Uncle Sam's fighting men will not be extended every courtesy and hospitality the regulations require in connection with these exhibitions. In fact, it is said if the committee should undertake to assign a tank, a flyer, a band, or some other symbol of the recent emergency, wherever a request has been filed, it would involve a complete withdrawal of the American forces abroad. However it is the determined policy of the committee to include every county seat in the sixty-eight counties included in the seventh federal reserve district in the route for the tanks, and as before, send airplanes to those places having adequate facilities to guarantee the safety of a landing.

Each tank will travel under its own power with two operators and a Victory loan speaker. They travel at the rate of five miles an hour and carry enough gasoline for a trip of at least forty miles. The schedule of the tank to cover southern Indiana reveals that it will be here on Friday, Apr. 18, and at Connersville for exhibition the previous day.

The schools will be included in the Victory campaign, with special exercises and instructions now being distributed through the office of the State Superintendent L. N. Hines. There will be the customary avalanche of paid advertising, which will be under the supervision of Geunsey Van Riper of Indianapolis. W. Q. Fitch, of the field force of Purdue university, secretary of the Indiana committee on food production and conservation, which recently staged a state-wide live stock rally in Indianapolis, is expected to take the direction of the farm bureau, at state headquarters, which will give special attention to the proper appeal to the agricultural interests of the state, to continue their whole hearted support of the government's financial program.

Mrs. Joe Woods of North Harrison street is ill with the influenza.

Mrs. Nora McGinnis and sons, Clifford and Fred have moved from South Harrison street to 416 West First street.

Mrs. Jessie McCauley was operated on at Sexton's hospital yesterday. Her condition is reported to be hopeful.

Bert West of the Marines, who has been spending a furlough with home folks has received word from the authorities at Miami, Florida, to the effect that it is not necessary for him to return to camp, but that his discharge will be forwarded to him soon.

L. B. Smelser, formerly a member of the Rushville high school faculty, is now on the staff of the Tennessean, a Nashville newspaper, according to word received by friends here, and is also studying law. Mr. Smelser was principal of the Frankfort high school after leaving here and later became instructor in public speaking at Wabash college, Crawfordsville, which position he held when he entered the service.

Will Prendergast, formerly of this county, who is employed by the Brooklyn Union Gas company, has sent the Daily Republican an attractive booklet describing the reception accorded the 27th division, New York troops, on its arrival from overseas last Monday. The booklet contains the pictures of New York officials and the reception committee, in addition to the picture of Major General John F. O'Ryan, commander of the 27th. He also forwarded a copy of the Brooklyn Daily Eagle, describing the parade.

IS FINED \$1 AND COSTS.

Bert Moorman was fined \$1 and costs by Squire J. P. Stech yesterday when he pleaded guilty to a charge of assault and battery on Robert Dyer.

Before The Advent Of Woman's Gladness

Women Who Know Take Precaution Against Suffering.

Before the arrival of the Stork, women for over half a century have learned the wisdom of giving nature a helping hand. Nausea, nervousness, bearing-down and stretching pains in the abdomen and muscles are entirely avoided by the use of Mother's Friend, according to the testimony of thousands of mothers who have used this time-honored remedy. Mother's Friend lubricates the fine network of nerves beneath the skin, and by regular use during the period the muscles are made and kept soft and elastic. They can then expand gently and easily when baby is born and pain and danger at the crisis is naturally avoided. Mother's Friend is a preparation of penetrating oils and other medicinal agents prepared especially for expectant mothers. It is for external use, is absolutely safe and should be used regularly during the entire period before baby comes. Write to the Bradford Regulator Company, Dept. A, Lamar Building, Atlanta, Georgia, for an interesting Motherhood Book, and obtain a bottle of Mother's Friend from the druggist. You will find it the greatest kind of help.

New York Music Teacher

Says "Vinol Cures Chronic Coughs"

New York City, 121 Nicholas Avenue.—"I teach piano and singing and when suffering from chronic coughs, colds and bronchitis, I use Vinol as I find it cures when other remedies fail."—Henry Albers.

The reason Vinol is so successful in such conditions, is because it is a constitutional remedy containing beef and cod liver peptones, iron and manganese peptones and glycerophosphates. It strengthens and revitalizes the entire system and assists nature to expel the disease.

We know of many such cases. F. B. Johnson & Co., Druggists and Druggists Everywhere.

Na-tu-ra

Is the crowning achievement of the First Century of The Hoosier State For the treatment of all forms of CATARRH.

Thousands of the best citizens of the state of Indiana have used NATURA and attest to its merits of efficiency. No more dependable people live than those of your own Home State.

J. M. Barr, Blountsville, Ind., says: I have been afflicted with catarrh for the past Forty Years. I had been in poor health for several years. I had a very bad case of stomach trouble. After eating I would often bloat until I was in distress.

My kidneys were badly affected and I had rheumatism; also had enlargement of the prostate gland. Soon after I began using NATURA I began to improve as I quit bloating which was a great relief to me. I have now used nine bottles of NATURA. It has benefited me more than all other medicines I ever used.

My health is better than it has been in years. The money I spent for NATURA is the best investment I ever made.

HOW TO PLAN, LOCATE HOME FOOD GARDENS

The farmer generally selects the choicest plot of ground on the farm for his vegetable garden, and no pains are spared to make the land rich and productive. The city or village gardener, on the other hand, has little or no choice as to the character of the soil or its location. It is a question with him of taking the available land and doing the best he can with it. The land at his disposal often is shaded during a portion of the day, and the soil frequently consists of hard clay, refuse accumulated from building operations, or materials that have been dumped upon the land. It is possible, however, to grow many of the garden vegetables under adverse conditions. Results obtained by many city gardeners during the past two years are considered truly remarkable by specialists of the United States Department of Agriculture.

In casting about for a location for the garden, the back yard or home plot should be given first consideration, the specialists say. As a general rule, a location near the house is most desirable. In the first place, if the garden is near, it can be worked during short periods, of

available time; then, it is more convenient for gathering the vegetables as they are wanted for use; and finally, the garden can be better protected from molestation.

If the back yard or other ground near the dwelling is too small, is

shaded during a considerable portion of the day, or if the soil is of such a character that vegetables cannot be grown upon it, the use of a vacant lot in the neighborhood is recommended. Where no land is available in the immediate vicinity of the home, community gardens located in the other part of the city have proved satisfactory.

There is a decided advantage in working upon one's own land, as the soil improves from year to year by fertilization and cultivation, and the best results can be secured where the use of the land is assured for a period of years.

Don't plant a garden where the sun does not shine for at least five hours each bright day. Don't locate the garden on soil that is so thin and where the rocks are so near the surface that the garden will burn out during the summer. Don't attempt to grow a garden on land that is more cinders and rock than soil. Don't plant a garden under or near large trees that will not only shade the crops, but, in addition, draw all the moisture and plant food from the soil. Don't plant a garden on land that overflows.

The ideal garden spot is seldom found but it is often possible to find a location that embodies the more important points and then to supply the others.

A definite plan for the garden should be drawn on paper before any planting is done. First, determine the exact dimensions of the available land; then ascertain which parts of the garden will be best adapted to certain crops, especially those that require a large amount of sunshine. Outline the garden plan

on paper and sketch in the crops that are to be planted upon each part.

In planning the garden it should be borne in mind that certain crops, such as lettuce, radishes, and early beets can frequently be grown in the same rows with other crops and be removed before the main crop attains sufficient size to require the entire space. It should also be remembered that carrots, beets, salsify, early turnips, parsnips, and all crops of that type may be grown in rows 12 to 18 inches apart and will

require less space than for exposure to the sunshine.

Due consideration should be given to both companion and succession cropping. By companion cropping, the plan of planting two or more crops together and removing those that mature first is followed. Buy succession cropping, one crop follows another, keeping the land fully occupied all the time. Thus, early cabbage may be followed by turnips, late beans, late beets, or late cabbage. The arrangement of crops,

however, depends somewhat upon the locality and length of the season.

Detailed directions for locating and planning gardens are contained in free bulletins of the United States Department of Agriculture, which will be sent upon application to the Department.

105 LB. TOURNAMENT OPENS

Rushville Among the Strong Contenders For the Trophy

Newcastle, Ind., March 28.—Junior basketball tossers from all over the state came to Newcastle today to participate in the state junior 105-pound basketball tournament which opens here today. The tournament continues through tomorrow.

Trophies are ready for the victor of the tournament and after it is ended a banquet will be tendered the champions. Strong contenders entered are Muncie, Anderson, Marion and Rushville. Thirty-two teams asked to be entered but the best were chosen.

DIRECT COST OF WAR

London, March 28.—Edgar Crammond, British financial writer, places the total direct cost of the war to the allies at £28,360,000,000 (\$141,800,000,000), and to the central European powers at £13,675,000,000.

The 1919 Wheat Crop

If weather conditions in this country are favorable there will be a record wheat crop in 1919. And every bushel of this wheat under the government guarantee will bring the farmer \$2.26.

This guarantee has back of it an appropriation of a billion dollars made by congress for the purpose of supporting the wheat price.

It is possible that the loss to the government may not be as great as anticipated. Mr. Hoover informs us that Europe will need more wheat than the estimates have called for. There will be no wheat raised in Russia, Serbia or Bulgaria, so these countries, which are usually exporters, will be obliged to import wheat. The crop will not exceed the usual amount.

These conditions may force up the market price of wheat and relieve the pockets of Messrs. Taxpayer & Co. As the pockets of Taxpayer & Co. are not especially full at present, such a result would be a welcome one.

PIMPLY? WELL, DON'T BE!

People Notice It. Drive Them Off with Dr. Edwards' Olive Tablets

A pimply face will not embarrass you much longer if you get a package of Dr. Edwards' Olive Tablets. The skin should begin to clear after you have taken the tablets a few nights.

Cleanse the blood, the bowels and the liver with Dr. Edwards' Olive Tablets, the successful substitute for calomel; there's never any sickness or pain after taking them. Dr. Edwards' Olive Tablets do that which calomel does, and just as effectively, but their action is gentle and safe instead of severe and irritating.

No one who takes Olive Tablets is ever cursed with "a dark brown taste," a bad breath, a dull, listless, "no good" feeling, constipation, torpid liver, bad disposition or pimply face.

Dr. Edwards' Olive Tablets are a purely vegetable compound mixed with olive oil; you will know them by their olive color.

Dr. Edwards spent years among patients afflicted with liver and bowel complaints, and Olive Tablets are the immensely effective result.

Take one or two nightly for a week. See how much better you feel and look. 10c and 25c per box. All druggists.

The League.

The idea of establishing a league to enforce peace is too good to remain a mere idea. It deserves to be a fact.

It is more likely to be one if we avoid pipe-dreams. If we recognize its numerous imperfections—and the prospect of complete breakdown—the scarcer will its imperfections—and breakdowns—become.

And here is one little circumstance. Hardly anything has been said about the relationship of the signatories if one or more of them indulged in a revolution. Are the rest of them still bound by their signatures?

If, for example, Italy turns bolshevist, and selects an Italian Trotsky and Lenin. Are the other nations bound by promises made to the present Italian government?

Or if the majority of the powers turn bolshevist (which is not at all improbable) is America bound to accept that majority's ruling and co-operate with it in a series of comic escapades resembling the daily program in Russia? Bedlam might break loose among the preponderating members of the league and what would become of the intelligent minority?

Let us pray that in signing this document we make such reservations as we need for our protection. Let us, for example, define with absolute precision the interpretation of its terms if a responsible foreign government is superseded by a non-descript aggregation of circus clowns.

It is supremely desirable that all nations sign it. Most of them will be prepared, if necessary, to put their own construction on the letter of its provisions.

Theodore Roosevelt's personality is no longer among us, but his "soul will go marching on" among Americans present and to come.

Uncle Sam's troubles in the peace conference are not concerned with boundaries and indemnities. He only wants to get his boys home and to "live happy ever after."

Great Britain is planning the development of aircraft for conveying passengers, mail and freight. It is stated that by this means the London mail could be conveyed to Calcutta in four days as against sixteen, the minimum at present.

At present corn is going down, and it will be some time at that before a new crop is coming up.

TO CONTINUE LOCAL BOARDS

Indianapolis, Ind., Mar. 28.—In order to maintain a "barometer" of changing labor conditions, the United States Employment Service today announced that the service of Community Labor Boards would be continued indefinitely. A demand for information as to the unemployment situation the country over, it is said, influenced the decision to continue weekly bulletins from the Service to large employers, public officials and others interested.

Sap and Salt

By BERT MOSES

No one will believe in you until you believe in yourself.

A low price and a bargain are radically different propositions.

Girls admire heroes who heave sighs more than heroes who heave bricks.

A kick from the rear does not rank so high in reform tactics as a pat on the back.

One-half of the world thinks the other half is trying to steal its money—and quite often it is.

Hez Heck says: "Most men think they could improve the weather if the Creator would only put them in charge of it."

You cannot judge a watch by its case, a book by its binding or a woman by her apparel. The things that don't show are what determine value.

Amusements

Harry Carey at Mystic

Harry Carey in "Hell Bent," is the offering at the Mystic theatre tonight. Saturday Bessie Eyton in "The Convert of the North," is to be shown and three good comedies, "Tobin's Palm," "Check Your Hat" and "The Dismissal of Phil," are also on the program.

Griffith Picture Repeated

D. W. Griffith's special production, "The Greatest Thing in Life," is being shown for the last time at the Princess theatre tonight.

It is a remarkable battle scene. No printed words can adequately describe this curtain of fire under the protection of which our Yank boys have repeatedly marched into the Hun trenches. You can see the heavy smoke clouds sweeping forward as though by the force of some unseen giant hand moving steadily toward the enemy trenches on a hill crest. You can see the shells exploding. It is so vivid that you can almost hear the crash.

Through the curtain of cloud a bombing aeroplane takes its perilous flight: now up almost in the real clouds; now darting like an angry wasp through the smoke and reek of the battle, just above the trenches.

The creeping barrage is a development of this war. Before the days of such intensive artillery fire such a tactical device was never dreamed of. This is the first visualization available to those at home.

Saturday Harry Morey in "Hoarded Assets," and also a Sunshine comedy "The Son of a Hun" is the offering.

CLARENCE MYERS IS BACK

Is Confined to Hospital at Portsmouth With Pneumonia

According to a letter received by Mr. and Mrs. Charles Harton of Milroy from Clarence Myers, he has safely arrived from overseas and is now stationed in a hospital at Portsmouth, Va. He arrived there about two weeks ago and since that time has been confined to the hospital from an attack of influenza-pneumonia which he contracted while coming from France. Private Myers was in France for eighteen months, having been gassed and also

wounded in the side with a machine gun bullet. Meyers enlisted early in 1917 with the marines while employed at Will G. Mulno's clothing store here.

CARTOONIST PLEASES

Despite bad weather and the increasing sickness in the community, a fairly large audience greeted Ash Davis, noted cartoonist and lecturer, in the third number of the lecture course at the Arlington M. E. church Wednesday night. His breezy, running conversation combined with his cartoons and pictures, which were perfect gems of art delighted the audience.

WEAKNESS REMAINS LONG AFTER

Influenza

Reports Show That Strength, Energy and Ambition Return Very Slowly to Grippe Patients.

After an attack of influenza, doctors advise that nature be assisted in its building-up process by the use of a good tonic—one that will not only put strength and endurance into the body, but will also help to build up and strengthen the run-down cells of the brain.

One of the most highly recommended remedies to put energy into both body and brain is Bio-feren—your physician knows the formula—it is printed below.

There's iron in Bio-feren—the kind of iron that makes red blood corpuscles and creates vigor. There is lecithin also; probably the best brain invigorator known to science. Then there is good old reliable gentian, that brings back your lagging appetite.

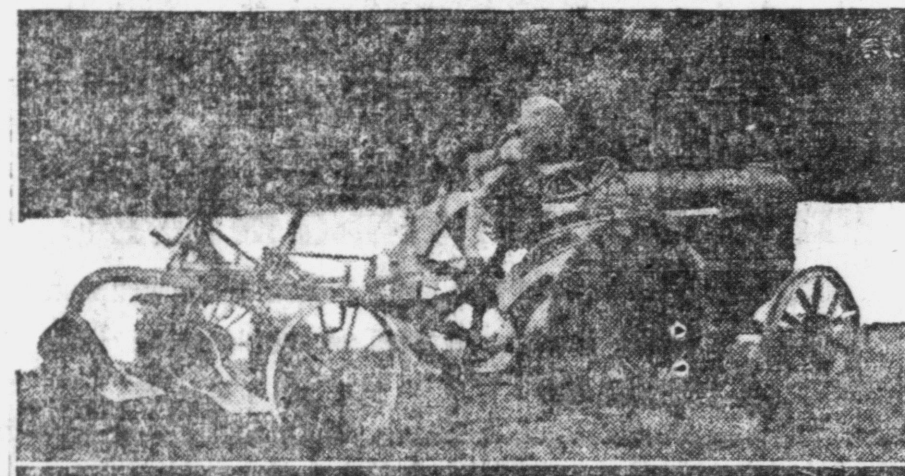

There are other ingredients that help to promote good health, as you can see by reading this formula, not forgetting kolo, that great agent that puts the power of endurance into weak people.

Taken altogether Bio-feren is a splendid active tonic that will greatly help any weak, run-down person to regain normal strength, energy, ambition and endurance.

Bio-feren is sold by all reliable druggists and is inexpensive. For weakness after influenza patients are advised to take two tablets after each meal and one at bed time—seven a day, until health, strength and vigor are fully restored.

It will not fail to help you and if for any reason you are dissatisfied with results your druggist is authorized to return your money upon request—without any red tape of any kind.

Note to physicians: There is no secret about the formula of Bio-feren. It is printed on every package. Here it is: Lecithin; Calcium Glycero-phosphate; Iron Peptonate; Manganese Peptonate; Ext. Nux. Vomica; Powdered Gentian; Phenolphthalein; Oleansin Capsicum. Kolo.

There won't be enough Fordson Tractors to go 'round!

THE demand for the Fordson tractor is so great that it will be a long time probably before everyone will be able to get one. Therefore, if you are looking for a tractor and wish a Fordson you should see us at once.

The Fordson has more than fulfilled expectations. With its economy—efficiency—durability—it is ideal for the average farm.

Burns kerosene—has special air washer—and all moving parts are enclosed—there is practically nothing to cause trouble.

Use it with the Oliver No. 7 Plow

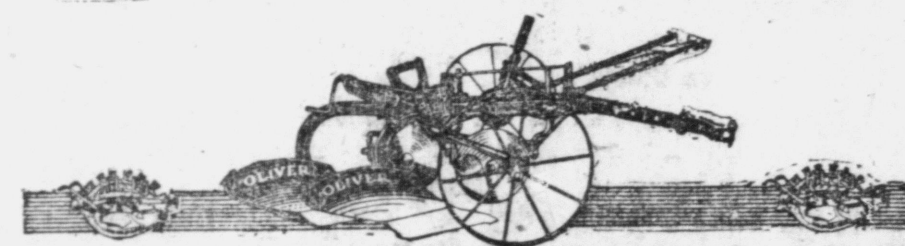

Here are some of the big Oliver features: The combined rolling coulters and jointer buries all stalks, weeds and trash at the bottom of the furrow; and the stop device maintains an even depth of furrow. The best plow for your Fordson—that's the Oliver.

Come in and let us show them to you.

Make This Test For Acid-Stomach

There are millions of people who suffer almost daily from the horrors of an acid-stomach—indigestion; sour, gassy, stomach; distressing heartburn; sickening food-repeating; painful bloating and that miserable, puffed up, lumpy feeling after eating. Many of these people have tried treatment after treatment; medicine after medicine; others have gone to doctors and stomach specialists and some to hospitals but in spite of all their efforts they have obtained no lasting relief or a permanent cure.

These symptoms simply mean acid-stomach. If allowed to run on, they are very likely to cause a lot of serious trouble. Dyspepsia, rheumatism, gout, lumbago, sciatica, splitting headache, dizzy spells, nervousness, sleeplessness, mental depression, melancholia, a feeling of listlessness and all-goneness—these are just a few of the disorders which can be traced to acid-stomach. As a matter of fact, acid-stomach is often the direct cause of those almost incurable conditions known as catarrh of the stomach, intestinal ulcer, and cancer of the stomach. The lives of those who suffer from these serious troubles are nothing short of daily agony. Surely, then, you must see how important it is to go at once to the seat of the trouble—acid-stomach. You know what acid-

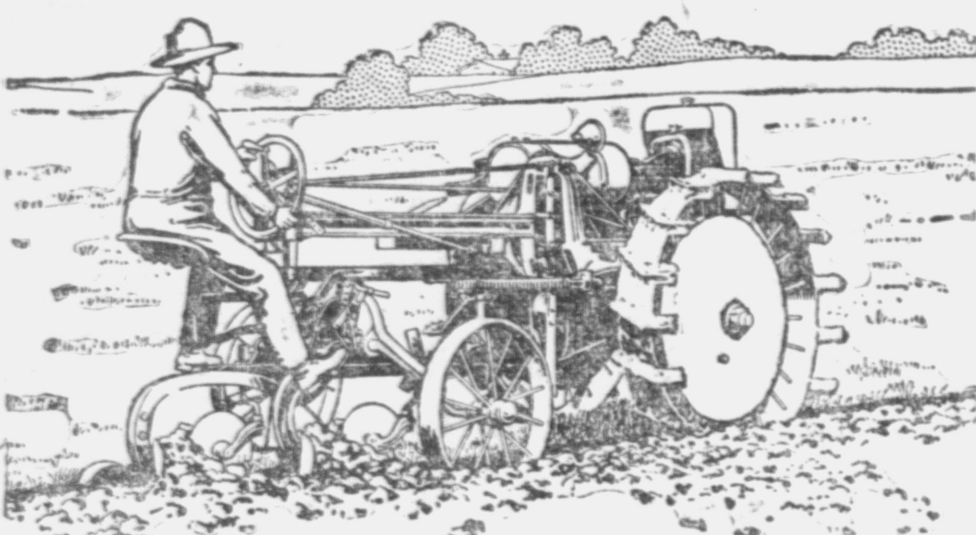

mouth does to the teeth—how it eats right through the hard enamel and causes them to decay. Think then of the havoc that must be caused by excess acid in the stomach!

Even if you are not suffering any immediate stomach pains, but are not feeling just as fit and fine as you should, you should by all means make this test: go to your drug store at once and get a big box of EATONIC. It is in the form of pleasant-tasting tablets—you eat them like a bit of candy. EATONIC is prepared for just one purpose—correcting acid-stomach by driving out the excess acid. EATONIC literally absorbs the excess acid. It brings instant relief from the pains of indigestion, heartburn, belching, sour, gassy stomach, bloating, etc. It makes the stomach pure, sweet, cool and comfortable, puts it in a normal, healthy condition, so that your food is properly digested. You need every bit of strength you can possibly get out of the food you eat—and EATONIC helps you get it.

Don't put this test off if you value your future good health and happiness. You run no chance at all because EATONIC is absolutely guaranteed to give you relief or your druggist will refund your money. The cost is a mere trifle.

TAKE EATONIC TODAY FOR YOUR ACID-STOMACH

ONE MAN OPERATES BOTH TRACTOR AND IMPLEMENT

MOLINE UNIVERSAL TRACTOR

It Solves The Farm Help Problem

With two 14-inch bottoms, under average plowing conditions, the new Moline Universal tractor, Model D, plows 9 acres in 10 hours, as much as ordinary 3-plow machine. The superior efficiency of the Moline Universal is due to its higher speed, 3½ miles an hour, two bottoms at 3½ miles giving the same number of plow-miles as three bottoms at 2½ miles.

Plowing at 3½ miles an hour gives ideal results, the ground being pulverized more thoroughly than at slower speeds, with less air space. Tough sod that cannot be turned at all at 2½ miles an hour is plowed with ease.

Perfect work is assured with the Moline Universal through the advantageous position of the operator, who sits in order to do good work. The Moline Universal is easily handled, turns short, and backs as readily as it goes forward.

Waste of time in the field is eliminated and the tractor kept at productive work a maximum number of hours a day through a complete electric starting and lighting system. The Moline Universal is the only tractor thus regularly equipped.

The secret of the speed and power of the Moline Universal lies in its perfected overhead-valve engine and two-wheel construction. The engine develops 18 horsepower at the belt, and 9 at the drawbar, every ounce of which is available for pull. There are no dead wheels to drag along that only carry weight and steer.

For plowing in extremely soft ground, the Moline Universal is equipped with a differential lock that enables the two drive wheels to be locked together, doubling their pulling power.

When plowing the land wheel is raised so that the tractor is level. The wheel is very easily and quickly raised or lowered.

The light weight of the Moline Universal, 3380 pounds, and its high clearance, 29½ inches, make it adapted for all other field work, besides plowing. With it one man can plant 40 acres a day, cultivate 20 acres a day, harvest 25 acres a day, or do any other work with equal speed. It is the ideal tractor for any sized farm, practically eliminating horses and solving the farm help problem.

Call and let us show you this remarkable machine.

At 8 o'clock Joseph Saylor Black will present an organ recital, assisted by Mrs. George Hogsett and Prof. Charles Ernest Parke. Everybody is cordially invited to attend all these services.

FRANK CAMERON RETURNS

Mrs. Nelle Cameron of Milroy has received a telegram to the effect that her husband, Frank Cameron, has arrived from France, according to a report received here, and is now at Newport News, Va. Mr. Cameron was overseas nine months, serving with the One Hundred and Thirty-Sixth Field Artillery.

Children smile when they take

FOLEY'S HONEY-TAR

1st. It tastes good.
2nd. It makes them feel good.
3rd. It will turn a distressed, fretful child into a happily smiling one.
Because it is just what children ought to have for feverish colds, coughs, croup, "snuffles" and heavy, wheezy breathing. It puts a healing, soothing, coating on a feverish, inflamed, tickling throat, and it stops coughs quickly. It is good for croup, too. It contains no morphine, chloroform, or other drug that you would not like to give to young children, and it is just as effective for grown-ups.

F. B. JOHNSON

NEW TIME GOES IN EFFECT MARCH 30

Clocks Throughout the Nation Will be Turned Ahead One Hour Next Sunday Morning

GIVES MORE DAYLIGHT HOURS

Railroads Schedules to Remain the Same, Though Few Trains May be Held at Terminal for Hour

The daylight saving schedule which was followed last summer for the first time in the United States, will again go into effect at 2 o'clock Sunday morning March 30. It appears that there was some dispute as to the exact hour when the clocks will be moved forward one hour, but according to the best information obtainable here the change will be made two hours after midnight Saturday.

The confusion as to the date is due to the wording and the evident intent of the law providing for the new schedule which was passed by the congress in the early spring of 1918. The law provides that the change shall be made on March 31 at 2 a. m., but was enacted with particular reference to 1918. The date was fixed because last year March 31 came on Sunday, but this year March 31 falls on Monday. However, it is the evident intent of congress to make the change on Sunday.

It is known that congress intended to make some changes in the daylight saving law, and probably repeal it altogether, but the filibuster which was staged during the closing hours of the session prevented any discussion of the law. As a result the former law stands as it was enacted in 1918.

The clocks are changed on Sunday morning because of convenience for the railroads. There are fewer trains operated on Sunday morning than at any other time of the week. The local railroad offices have received official word that the clocks will be moved forward at 2 o'clock Sunday morning, so it is known that the railroads will follow the new schedule after that time, regardless of what others may do. However, in view of the fact that the public is inclined to adopt the same time that the railroads do it is expected that the change will be made throughout the country at that hour.

The daylight saving plan is not as popular in rural communities as it is in the industrial centers. Many of the factories here begin work at 7 o'clock which under the new schedule means 6 a. m. Instead of quitting work at 6 o'clock in the afternoon, the are relieved at 5 o'clock. It is this feature that appeals to many people, especially to those who tend their own gardens, as it gives them another hour after working time to look after their gardens.

It really makes little difference to farmers during the summer months what time the clock may show as they work from early morning to late at night in order to take care of the large amount of work that must be done at that season of the year. However, the majority of farmers would prefer the standard time to the new daylight saving hours as a matter of convenience when they leave the farm.

The change in time will be made as it was last year and no difficulty is anticipated. Most of the trains that are due to leave their terminals about midnight will be held for one hour so that they will reach their destinations as shown by the revised schedule.

TO FIGHT FOR FIGHTERS

(By United Press.)

San Francisco, Mar. 28.—Fred Fulton and Jeff Clark, the "fighting ghost," will be the headliners tonight at a boxing card arranged by the police department for the benefit of returning soldiers and sailors.

RICHMOND HERO HONORED

Richmond, Ind., March 28.—Corporal George H. Gibbs of Richmond, a member of the 148th Infantry, has been awarded the French Croix De Guerre for conspicuous bravery in action against the Huns.

HERE'S QUICK RELIEF FOR YOUR TIRED, STRAINED MUSCLES

When your muscles become tired and swollen and the joints become stiff, your circulation poor, and your suffering makes you irritable, an application of Sloan's Liniment gives you quick relief—kills pain, starts up a good circulation, relieves congestion. It is easier and cleaner to use than musky plasters or ointments, acts quickly and does not clog the pores. It does not stain the skin.

For sprains, strains, bruises, "black and blue" spots, Sloan's Liniment reduces the pain and eases the soreness.

Certainly fine for rheumatism, stiff neck, sciatica, lame back, toothache. You don't need to rub—it penetrates.

Its use is so universal that you'll consider Sloan's Liniment a friend of the whole family. Generous size bottles at druggists everywhere.

Willard SERVICE STATION

The Long and the Short of It

Any battery will be short lived unless it is properly cared for.

Willard Bone-Dry Batteries are unusually long-lived where the few simple rules of battery care that apply to all batteries, are followed.

Rule 1—Add distilled water every week or two to each cell, so that level-of solution is always ½ inch above plates.

Rule 2—Keep battery fully charged.

Rule 3—Don't overheat your battery.

Of course there are other rules, too, that will help you to get the most out of your battery. Drive around this way and let us tell you about them in detail.

DECIDE YOURSELF

The Opportunity is Here, Backed by
Rushville Testimony

Don't take our word for it.
Don't depend on a stranger's
statement.
Read Rushville endorsement.
Read the statements of Rushville
citizens.
And decide for yourself.
Here is one case of it.

M. Conner, cigar manufacturer,
1001 N. Harrison St., Rushville
says: "I had backache and pains
through my kidneys. My kidneys
acted irregularly. Doan's Kidney
Pills stopped the pain in my back
and regulated my kidneys."

NO TROUBLE SINCE

More than three years later, Mr.
Conner said: "I haven't had to use
Doan's Kidney Pills since giving my
former endorsement, telling what
they did for me. I am sure the cure
is permanent."

Price 60c, at all dealers. Don't
simply ask for a kidney remedy—
get Doan's Kidney Pills—the same
that Mr. Conner had. Foster-Mil-
burn Co., Mfrs., Buffalo, N. Y.—
(Adv.)

The Royal Neighbors will have a
called meeting Monday night in the
Modern Woodmen hall in West Third
street. All members are urged to
be present.

About thirty-five couples attend-
ed the dance last evening given in
the Modern Woodman hall, in West
Third street. The Greensburg jazz
orchestra furnished the music for
the evening. Only a few out-of-town
guests were present.

Members of Mrs. Jesse Bennett's
Bible class of the First Presbyter-
ian church were entertained yester-
day afternoon by Mrs. J. R. Car-
michael at her home in North Main
street. The afternoon was devoted
to a brief business session after
which a social hour followed.

The Misses Nora and Mary
Sleeth were hostesses for the
Shakespeare club last evening at
their home in West First street. At

the meeting Prof. Jenkins of Ind-
iana university, delivered a lecture
on "Russia," which proved to be one
of the most interesting talks of the
series of lectures he has given be-
fore the club.

Mrs. Charles Mohler and daughter
gave a miscellaneous shower at
their home near Mays yesterday af-
ternoon, honoring Mrs. Thomas
Heck, who was recently married.
Mrs. Heck, formerly Miss Loa Cald-
well, received many beautiful and
useful presents. The afternoon was
spent socially and dainty refresh-
ments were served by the hostesses.

One of the pretty social events of
the season was the Auction Bridge
party given by Miss Bertha Helm
yesterday afternoon at the home of
Mrs. A. L. Gary in North Harrison
street. The spacious rooms, where
the nine card tables were arranged,
were beautifully decorated with
clusters of cut flowers. The guests
enjoyed the afternoon playing
cards, after which a delicious six
o'clock dinner was served to the
many guests.

Eighteen members of the Daugh-
ters of the American Revolution met
yesterday afternoon at the home of
Miss Emma Cassady in North Mor-
gan street. After a short business
session, an interesting program was
given, during which time Mrs. Ho-
mer Bell of Huntington, West Vir-
ginia, gave several musical selec-
tions. Mrs. Bell and Mrs. E. A.
Strong of Indianapolis were the
out-of-town guests. Light refresh-
ments were served late in the af-
ternoon.

Miss Doris Saxon was the hostess
for the Priscilla Art Club yesterday
afternoon at her home east of Fair-

view. There were ten members pre-
sent and one guest, Miss Mary Dun-
can. The afternoon was spent with
needlework, at the close of which a
dainty two course luncheon was
served.

Mrs. Gano Perry entertained all
of the members of the C. C. club
yesterday at her home east of this-
city. The afternoon was spent in
playing cards at the close of the
playing a dainty luncheon was served.

JURY DISAGREES IN
HUTCHERSON CASE

Fails to Reach Verdict in \$500 Dam-
age Suit Against the City and is
Discharged.

The jury in the case of Grover
Hutcherson against the city of
Rushville, for \$500 damages alleged
to have been sustained when the
plaintiff ran into a traffic post at the
corner of Morgan and Second
streets with his automobile, March
20, 1918, disagreed and was dis-
charged about 5:30 o'clock yester-
day evening. The jury, which re-
ceived the case about 10 o'clock
yesterday morning, was reported to
have been evenly divided most of the
time. Some jurymen favored giving
Hutcherson damages, it is said.

The case of the Standard Oil
company against Reinheimer and
Capp, on an account for \$2,300,
which was set for trial today, was
sent to Hancock county on change
of venue, on motion of the defend-
ants. A deputy of the state attorney
general has entered an appearance
for the defense in the habeas cor-
pus proceedings of W. A. McDonald
against Luther Short, superintend-
ent, and the trustees of the Sol-
diers' and Sailors' Orphans' home,
to recover his children who are in
the home. The defendant has filed an
offer to confess judgment in the
case of Arthur B. Hall against Har-
ry M. Arnold on an account for
\$550.

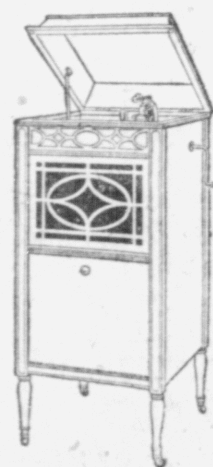

COMES HOME ON CRUTCHES

Relatives of Sergt. Ralph Wagon-
er received word from him today to
the effect that he has safely arrived
in New York after spending nearly
nine months in France. Sergt. Wag-
oner came over on a hospital ship,
having been suffering from broken
arches. Word was also received from
the captain stating that Sergt. Wag-
oner would be sent on home for
treatment but would not be dis-
charged until he was physically fit
as it would be necessary for him to
use crutches for some time.

WIRELESS PHONE MAY SPAN OCEAN

Marconi Wireless Experts are Making a Series of Investigations Which are Successful.

THOUGHT IT WASN'T POSSIBLE

But Plans are Under Way to Install a Wireless System From New York to London.

(By United Press)
New York, Mar. 28.—“Hello! Hello! Is this New York? Yes? Well, how's every little thing along Broadway?”

“Ah, hello there, cousin! How's dear Old London?”

A telephonic conversation between London and New York? Yes, certainly. And at no very far distant date, either.

At least, that's what the Marconi wireless experts are saying in New York. And they ought to know—for the experts have been making some very exhaustive experiments.

Roy A. Weagant, Marconi's chief engineer, announced shortly after the armistice was signed that his new discovery would quite eliminate the interference of static electricity from radio-graphic currents. At first the scientific world was skeptical. They didn't think it could be done.

Nevertheless, Weagant was correct in his deductions, according to the Marconi company, and as a result plans already are under way for the installation of a wireless telephone system between New York and London.

Statistics, or “strays” as they are known in the bewildering language of the wireless experts, are loose, uncontrolled electrical elements. Weagant told the members of the New York Electrical Society, and these statistics stray into the wireless messages sent through the air. They cause such a din at times that the messages are drowned. He has discovered the natural law which causes statics to travel in a vertical path. Weagant added, while the wave links of a radio message take a path parallel with the earth.

Weagant's discovery makes it possible to catch the statics going one way and the wireless wave going at right angles. In this way the two are kept from coming into contact and practically all of the trouble is thus eliminated.

In commenting upon the discovery Marconi officials said that the elimination of atmospheric interference perfects the wireless to such a degree that transatlantic telephony is a comparatively simple matter. As a result, the wireless telephone will soon conquer the ocean, the experts maintain, and the human voice speaking in New York, will quickly find an echo in London.

Wasn't it S. F. B. Morse who asked, “What hath God wrought?”

AFTER CLOUDS COMES SUNSHINE.
AFTER DESPONDENCY COMES JOY.
AFTER SICKNESS COMES HEALTH.
AFTER WEAKNESS COMES STRENGTH.

In the spring when you're “all in”—fagged out—blood thin, if you will turn to Nature's remedy, a tonic made from wild roots and barks, which has stood fifty years as the best spring tonic—you will find strength regained. No need to tell you it's Dr. Pierce's Golden Medical Discovery, put up in tablet or liquid form, and sold by every druggist in the land. After a hard winter—shut up indoors, your blood needs a temperance tonic, a tissue-builder and blood-maker such as this “Medical Discovery” of Dr. Pierce's.

Send 10 cents to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y., for trial package.
Greenbay, Wis.—“Dr. Pierce's Golden Medical Discovery is a splendid medicine. I have used it in my family for many years for coughs, colds and La Grippe. I have used it for these ailments, and it always gave perfect satisfaction, knowing what it has done for us I highly recommend it.”
—Mrs. Ed Basche, 421 5th St.

COLLEGE STUDENTS LEARN AVIATION

Division of Military Aeronautics Prepares Course for Training Fliers

GRADUATE IN THREE YEARS

Will Then be Prepared for Sport, Military or Commercial Aerial Duties

(By United Press)

New York, Mar. 28.—Paving the way for future commercial aerial activities and at the same time making ready an air force for military needs, the Division of Military Aeronautics has arranged a training program for college students which will not interfere with their prescribed college courses but will, at the end of three years turn them out prepared for commercial, sport or military aviation duties.

The plan, as announced by the War Department, in connection with its Exhibit at the Aeronautical Exposition here, permits the college student to absorb the courses previously included in the curriculum of the ground schools while working for his degree.

The assumption of the War Department is that aviators must be young men, and they point to the experience of the war to prove their point. For this reason, they say, there must be a constant stream of candidates going through the schools.

The government's detailed plan as explained at the Aeronautical Exposition by Colonel B. E. Castle formerly of the Control Board, Division of Military Aeronautics, is as follows:

“We are proceeding on the assumption that aviators will become superannuated more rapidly than any other kind of officer, so that it is imperative that the supply of trained personnel be kept up. In view of the strength of the air service at the

cessation of hostilities and in view of the depreciation among our reserve officers of not less than ten per cent a year, it is estimated that we must draw about 1,000 pilots, 850 airplane and balloon observers, and 100 engineer officers every year.

“In order not to take the better part of a year of a man's time to train him as a pilot or observer, the machinery of the Reserve Officers' Training Corps was chosen as most likely to bring about desired results.

“In outline the plan is to give the equivalent of the work formerly done in the ground schools exclusive of military practice—that is, airplanes, engines, gunnery, navigation and maps, infantry and artillery co-operation, and signalling—at the college and universities during the college year and give flying and military training during the six weeks summer camps held at northern flying fields.

Everything possible will be done to cultivate a high esprit de corps among the candidates by general lectures on the achievements of Air Service and by the fostering of sports and games as a part of the curriculum.”

FORM LEAGUE OF VOTERS

St. Louis, Mo., Mar. 27.—The National American Woman's Suffrage association became the league of Woman's Voters shortly before noon today.

CAPITOL SHRINERS ENTERTAIN TODAY

Occasion is The Annual Spring Ceremonial Session at the Murat Temple

VISITING SHRINERS THERE

(By United Press.)

Indianapolis, Ind., March 28.—Capitol shriners today entertained others of that order at a celebration at the Murat temple here. The occasion was the annual spring ceremonial session.

One of the largest classes of candidates ever advanced in the local order was to be taken “across the desert” at the meeting.

Cincinnati shriners were visiting the celebration and others from all parts of the state were here.

To entertain the visitors a big show was to be given entitled “A Day on the Desert.” In this was to be a sand-storm and other features to portray Arabian life.

DEBS ASKS REHEARING

Washington, Mar. 27.—Eugene Debs today filed in the supreme court a petition for a rehearing. The court recently affirmed Debs' conviction under the espionage law, under which he was sentenced to the federal penitentiary.

STRESS OF BUSINESS

A nation's necessity has plunged many thousands of boys and girls in their teens into the vortex of business before their time. Many will feel the strain upon vitality and energy and likewise the need for the nourishing and tonic virtues of

SCOTT'S EMULSION

A very little, taken regularly, is far more beneficial than when taken by fits and starts. Scott's Emulsion is concentrated nourishment that contributes to strength and helps confirm the body in vigor and health.

Scott & Bowne, Bloomfield, N. J.

12-24

Catarrh is a Real Enemy and Requires Vigorous Treatment

Do Not Neglect It.

When you use medicated sprays, atomizers and douches for your Catarrh, you may succeed in unstopping the choked-up air passages for the time being, but this annoying condition returns, and you have to do the same thing over and over again. Catarrh has never yet been cured by these local applications. Have you ever experienced any real benefit from such treatment?

Throw these makeshift remedies to the winds, and get on the right treatment. Go to your drug store to-day, get a bottle of S. S. S., and commence a treatment that has been praised by sufferers for nearly half a century. S. S. S. gets right at the source of Catarrh, and forces from the blood the germs which cause the disease. You can obtain special medical advice regarding your own case without charge by writing to Medical Director, 22 Swift Laboratory, Atlanta, Ga.

The Monarch Kruse and Dewenter Annealed Steel Warm Air Furnace

The accompanying cut represents our "MONARCH & PORTABLE FURNACE." This furnace is designed as a strictly first class furnace in every respect and as a portable furnace is superior to any of its kind. It is readily seen from the engraving that the furnace has a very large radiating surface. The radiator is made upon an entirely new plan having reversible flues, the smoke and heat passing through two openings each side and down to the base of the radiator and then back again to the top before entering the smoke flue, thereby preventing a loss of heat. The furnace is constructed throughout of annealed steel plates and is absolutely gas-tight in every part. The fire box is lined with fire clay tile lining. It burns anthracite and soft coal, coke, wood and natural gas. In use over 35 years. Sold and installed by

Walter Perkins

with 22 years of practical experience in warm air heating. Why take a chance on a furnace with a cast iron fire pot installed by some one who knows little or nothing of warm air heating when you can get the best at a less price than you are asked for a cast iron furnace.

High School Notes

The "flu" has flown from the faculty. All teachers who were out of school last week have returned and are conducting their regular recitations.

□ □

The six weeks grades were given out Monday. They were a week late but better late than never. As usual everyone was "up in the air" over the number of check marks received.

□ □

The Booster Club held a meeting Monday and discussed plans for the dinner to be given to the members of the varsity basketball team. It looks now at the rate there going that the dinner may be given sometime before next Christmas.

□ □

Since Carthage withdrew her representative from the County Contest of the State High School Discussion League, to have been held in Milroy last evening, George Little, representing Rushville high school, was declared winner by default. The district discussion will be held in Fortville on April 11. The subject this year is "Universal Service for Citizenship" which will be ably discussed by our representative. Last year the district contest was held here and Fortville won over Newcastle.

□ □

The Carpentry class of the high school wishes to carry their ideas and ability into practice. Their plan is to advertise to find a man who wants a garage built. The owner of the garage furnishes the foundation and the lumber and the class under the personal supervision of Mr. Sloan, the instructor, will guarantee satisfaction. The class of twelve boys will build a demountable frame at school and cut and saw all rafters in the shop. Then this material will be taken to the place of erection to be completed. A hip roof is preferred. No competition is desired. For particulars address Mr. Scholl or Mr. Sloan.

□ □

The Junior high school basketball team has been picked as one of the twelve strongest teams which will meet in the tournament at Newcastle Friday and Saturday to decide the state championship of the 107 lb. class.

□ □

Miss Davis was unable to take her classes Thursday on account of a severe cold.

U. OF C. GETS BUSY

(By United Press.)

Berkeley, Cal., March 28.—If practice makes perfect, the University of California football team should take all Western honors this fall. Coach Andy Smith is already hard at work on the prospects for the next 'varsity, and strenuous practices are being held three days each week.

IF MOTHERS ONLY KNEW

During these days how many children are complaining of headache, feverishness, stomach troubles and irregular bowels. If mothers only knew what Mother Gray's Sweet Powders would do for their children no family would ever be without them. These powders are so easy and pleasant to take and so effective in their action that mothers who once use them always tell others about them. Sold by druggists everywhere.—(Adv.)

ODD FELLOWS WILL INSTITUTE A LODGE

Arlington Encampment Will be Installed Monday Night by Grand Patriarch Beeler

TO START WITH 75 MEMBERS

A. W. Beeler, grand patriarch of the grand encampment of Odd Fellows, will institute a lodge of the order at Arlington next Monday. The lodge will be known as Arlington Encampment No. 380, I. O. O. F. and starts out very auspiciously with seventy-five charter members. It will meet in the hall of Beech Grove Lodge No. 399, I. O. O. F.

The encampment represents the three higher degrees of the Odd Fellows not included in the subordinate lodges and is a regularly organized body paying benefits and relieving distress wherever found among its members. Most of the social activities of the Odd Fellows is carried out in encampment.

The degree staff of Bernice Encampment No. 12 of this city will confer the three degrees on this class in the evening, beginning at 7:30. A large attendance from here is expected on this account. Several candidates from the local lodge will take the work at the same time. A rehearsal of the staff will be held Saturday night.

DECREASE IN NUMBER OF CASUALTIES TODAY

Total of One Hundred and Ninety-One is Reported by the Commanding General

TWO HOOSIERS IN REPORT

Washington, Mar. 28.—The following list of casualties were reported today by the commanding general of the American Expeditionary Forces: Killed in action, 8; died from wounds, 7; died of disease, 56; died of accident and other causes, 16; wounded severely, 9; wounded slightly, 72; wounded degree undetermined, 22; missing in action, 1; total, 191.

Two Hoosiers were in the report as follows:

Died of disease—Sergt. James Anderson Holloway, Clarksville.
Wounded slightly—Private Vernie Narvelle, Greenfield.

Janesville Tandem Disk Harrow

THE Budlong Harrow is the only harrow we know of in which the bearings do not cramp while the machine is working. This freedom in the bearings means light draft and flexibility in the whole harrow. This allows the Budlong to make use, in a natural way, of all of its penetrating qualities to thoroughly pulverize the soil under the most trying conditions.

The rear harrow is built like a bridge and no manner of hard work will ever force this harrow to buckle in the middle.

Its Backbone Is as Rigid as a Concrete Arch

The trailer steadily holds its place back of the Budlong, whether used on side hills or on the level, on account of the way it is attached to the front harrow.

The same material used in all Janesville machines is found in the Janesville Tandem. Made in sizes from four to ten feet with sixteen-inch blades.

We looked them all over and felt our trade and local conditions would be best served by this Janesville model. Compare notes with us before you buy.

C. H. (Nick) TOMPKINS

ABANDONS CARGO OF BOOZE IN CAR

Driver of Machine Which Hit Truck
Here Leaves 96 Quarts of Whis-
key West of City.

RADIATOR SPRINGS A LEAK.

Telephone Inquiry From Indianapo-
lis About "Stolen" Car Leads
Prosecutor to Investigate.

The driver of the automobile who ran into the rear of the Pinnell-Tompkins truck at the corner of Main and Second streets yesterday afternoon at 4 o'clock, had a cargo of booze aboard, which was later abandoned near the Carr farm west of Rushville. The hood and radiator cap of the machine were ripped off when it came in contact with the truck and the radiator was damaged. This did not stop the driver, however, for he did not even hesitate, but proceeded on down Second street as fast as the car would carry him. After the radiator sprung a leak, it was not possible for the driver to go very far as the engine became overheated. He ripped the license plates from the machine and it was said by residents of that neighborhood that he got into another car and went on to Indianapolis, leaving the booze and machine to its fate. Upon examination of the car it was discovered that there were 96 quarts of whiskey, in addition to 12 quarts of beer, in the machine. The wholesale value of the whiskey is estimated at \$250. It was packed in eight grain sacks.

Last night a long distance phone call came into the police station for Chief of Police Seward. Marshal Newhouse answered the call and the man at the other end of the wire said that his name was Jack Wright of Indianapolis and that he had been informed that his car, which had been stolen, was being held by the police of this city. Prosecutor Stevens was called to the phone and Wright told the prosecutor that the car had been stolen Wednesday morning. He said that someone had informed him by telephone that the car was here, when asked how he knew the car was being held. The prosecutor said that he was going to Indianapolis this morning and if Mr. Wright would meet him at the terminal, they would talk the matter over, to which Mr. Wright agreed.

An investigation showed that no one from this city had sent a call to Indianapolis for Mr. Wright and this morning when the prosecutor left for Indianapolis, he had papers filled out for his arrest, and it was thought that he would return with the man he was looking for.

The first thought of persons who saw the accident yesterday evening, was that the machine was loaded with liquor, else the driver would have stopped for the hood and radiator cap.

The machine was going west in Second street and the truck north in Main street. The truck had not cleared the crossing of Second street when the driver of the light five-passenger car started across Main street. The front end of the machine was wedged up under the rear end of the bed of the truck, which pulled off the hood and radiator cap. The collision happened so quickly that the automobile was barely brought to a stop, and just as soon as it was released from the rear of the truck, the driver sped on down second street, leaving a streak of water which was leaking from the radiator. It was believed that he would not be able to go far with no water.

BUYS AMERICAN COAL

Rome, Mar. 28.—The Italian mission today accepted America's offer of three million tons of coal at \$25 a ton, to be delivered within six months.

Contractor Hopes to Have New
Building Finished in June

The work of wrecking the old buildings occupied by Daniels barber shop and Caron's candy Kitchen will probably be started Monday week. The owners contemplate erecting a modern two story building with Bedford stone front similar to that of the Rushville National bank. The upstairs will be fitted up with offices with every modern convenience and the entire building will be heated by steam. E. L. Kennedy is the contractor, and he expects to have the building ready for occupancy by the middle of June.

IDENTITY OF DEAD WOMAN IS MYSTERY

No One Can be Found in Southern
Rush County Who Knows Elva
Dickerson, A Suicide

TAKES LIFE IN INDIANAPOLIS

Addresses Note to Rushville, R. R.
1, Box 47, Saying That She
Was Tired of Living

(By United Press.)

Indianapolis, Mar. 28.—Tired of living, Elva Dickerson, 25, committed suicide by taking carboic acid in the woman's rest room at the Traction Terminal building today. Her body was found by the matron at the station who thought the woman was asleep. Dr. Paul Robinson, coroner, discovered a note in the girl's pocketbook which reads: "Rushville, rural route, Box 47. I am tired of living and I am going to take this poison. Elva Dickerson."

No one can be found in southern Rush county who knows Elva Dickerson, the young woman reported in the above dispatch to have committed suicide in Indianapolis today.

James Moore, mail carrier on rural route No. 1, of this city, said this morning that Box 47 belonged to Dick Gwinup, living south of New Salem. The Gwinup home was called by telephone, but it was stated their mail box number was 36. Furthermore, the person at Gwinup's home who talked over the telephone said that Miss Dickerson was not known in that neighborhood.

Counting Gwinup's box number as 36, No. 47 should be Edgar Martin's, but a telephone call to Martin's home this afternoon failed to throw any light on the mystery surrounding the identity of Miss Dickerson. Telephone operators at New Salem do not know her.

The mail carrier is certain that Box 47 is some place in the vicinity of New Salem. No explanation could be found for Miss Dickerson addressing the note to this address when no one in the vicinity knew her.

This afternoon's edition of the Indianapolis News says that Miss Dickerson died within fifteen minutes after attaches of the state found her. Mrs. Anna Veach, matron at the station, told the coroner according to the News, that she saw the young woman sitting on a bench in the basement and thought she had fallen asleep. She said she attempted to arouse her and then noticed the odor of acid. Mrs. Veach summoned Dr. Norman E. Jones, who has an office in the building, but the girl died shortly after his arrival.

The bottle, which had contained the poison, was found in her purse with the note attached to it.

Mrs. Mary DeLoyht, Indianapolis, said she was in the basement when the young woman came in, but did not see her take the poison.

BOLSHEVIKS ENTER AMENDMENTS TO EASTERN GALICIA BE MADE TO DRAFT

Advance of Russian Forces is so
Rapid That Austria is Threat-
ened, Berne Advices Say

UPRISING GAINS HEADWAY

Premier Lenine Urges Hungarian
Soviet to Send a Bolshevik
Army Against Vienna

(By United Press.)

London, Mar. 28.—The British government will deport Russian Bolsheviks to Odessa in April, it was announced today.

Paris, Mar. 28.—A French newspaper today sent its rumor that Premier Lenine and War Minister Trotsky have sent a note to the United States asking that this country recognize the Russian Bolshevik government.

Berne, Mar. 28.—Russian Bolshevik forces, penetrating eastern Galicia, are advancing so rapidly that Austria is threatened, according to advices today. The important oil region of Galicia is said to have been completely occupied.

Zurich, Mar. 28.—Seven thousand Italian troops have occupied Stuhl-Weissenburg, 35 miles southeast of Budapest and Raab, 67 miles northwest, taking over a part of the Vienna-Budapest railway, according to dispatches received here today.

Two Roumanian army corps are said to have crossed the frontier of eastern Galicia.

Paris, Mar. 28.—Revolutionary troops in Bessarabia and Ukraine are joining the Russian forces, according to advices received here today.

The workmen and soldiers council in Lemberg are said to be proclaiming a revolution, effective throughout Galicia.

Copenhagen, Mar. 28.—War Minister Trotsky has announced in a wireless statement that the Soviet revolution in Galicia is gaining headway, a Vienna dispatch reported today.

The uprising started 40 miles southwest of Lemberg, the statement said, and is spreading rapidly. Polish troops in Lemberg are alleged to have joined the revolution and declared a general strike.

Berlin, Mar. 28.—Premier Lenine has wired the Hungarian Soviet government urging that it send a Bolshevik army against Vienna, according to dispatches received from Budapest today. He is said to have promised to finance a Hungarian expedition against Austria to the extent of \$20,000,000.

Discovering that Spartans planned to arm several thousand imprisoned Russians tomorrow, Americans rushed the prisoners aboard trains and are scattering them in prison camps throughout Germany in charge of America.

Radicals in other parts of Germany have begun to take matters into their own hands. In Wurtemberg they have declared a general strike to force the government to accept socialization of industries. Leipzig is said to be under the dictatorship of five communists. The Bavarian government has ordered factories in that state to begin production on a communistic basis.

TO TRY LUDENDORFF

(By United Press.)

Berlin, March 28.—The national assembly has established a supreme court to try General Ludendorff, former Chancellor Von Bethman-Hollweg and other officers alleged to be responsible for the war, a dispatch from Weimar reported today.

Will Cover Monroe Doctrine, Claims
For Racial Equalities and More
Military Guarantees

SCOPE OF PACT UNSETTLED

Whether it Shall be With Germany
or All Allied Enemies Rests
With "Big Four"

(By United Press.)

Paris, Mar. 28.—The French assembly unanimously passed a resolution today declaring that integral reparation and damages must be demanded from Germany and that all German criminals should be punished.

Paris, Mar. 28.—The allies, it was reported today, have decided to give the Roumanian army all necessary equipment to establish it on a firm basis. At the same time the Baltic and Black sea frontiers have been reorganized and the inter-allied high command is taking it in hands in operation against the Bolsheviks in these regions.

Paris, Mar. 28.—The revised covenant of the league of nations will be presented to the league commission with three important amendments still in abeyance, it developed today.

These amendments cover the Monroe Doctrine, Japanese claims for racial equalities and France's recommendation for greater guarantees of military securities.

Delay in the presentation of the Monroe Doctrine amendment is understood to have been due to information that other nations will take the opportunity to draw clauses covering similar acceptances.

Whether the first treaty will be with Germany and Austria or for all the enemy powers probably will depend upon developments in the "Big Four" conference, it was learned today.

The French have added their disapproval to that of the British to the quadruple treaty ideas. Both the French and the British think it might be possible to include Austria in the first treaty without much difficulty, but inclusion of Bulgaria and Turkey would mean additional delay.

The reparation committee is understood to have made the best progress this week of any period since the beginning of their work. It is said that it is to the stage where actual amounts to be received by the various allied countries is being discussed on the basis of what Germany is able to pay instead of what each country is entitled to.

Secretary Lansing, Foreign Minister Somino, Foreign Secretary Balfour and French Minister Pichon are now holding a meeting similar to those of the "Big Four" in an effort to make additional speed toward reaching a peace settlement.

The league of nations constitution, which is now in the hands of a special drafting committee, is expected to be completed shortly.

This committee is under restrictions to frame the form of the covenant. It can not add to or take away from the substance.

President Wilson, it was announced, is free to bring up his Monroe Doctrine when the league committee meets again to receive the redraft.

At the last session of the league committee, it was learned, a clause was inserted making it clear that mandatories must be voluntary. Provision was also made for opening of the officials of the league to the women as well as the men. In regard to the withdrawal of a nation from the league, it must give a two years notice.

BOARD MAKES GOOD SHOW

Is Among The First To Send Draft
Reports

The local draft board received a bulletin yesterday from the selective service division reporting the record made by each board in filing away their records and shipping them in to the war department. Rush county was the 14th board to report their records created, 19th to report their records shipped, 8th to report the office of the draft board closed and 24th to report the sale of all government property in their possession. Decatur county held the highest record in the state having been the first county to report at three different times. On the other occasion she was well toward the front, reporting in the 12th place.

5 CONTRACTS TO BE LET TOMORROW

Commissioners Will Receive Bids
For Two Cement Highways and
Three to be Built of Stone

MORE PETITIONS CIRCULATED

Three of Them Will Seek to Have
Roads From Here to Henry
County Line Paved

The commissioners will receive bids on five highways, two of which will be cement, tomorrow afternoon at two o'clock. These will be the first road contracts let since shortly after the war began, when road construction was curtailed.

The contracts to be awarded are for the John G. Beale road in Rushville township and the Willard Tribbey road in Posey township, both of which are to be cement; the Chester Cross road in Jackson township, the William T. Moore road in Richland township and the Fred McManus road on the Jackson-Center township line, all of which are to be constructed of crushed stone. These roads are to be built under the three-mile road law.

More petitions are being prepared for roads under the new county unit law. At least three more are being circulated for cement highways, from Rushville to the Henry county line, each following a different route than the one filed by Voorhees Cavitt and others last Monday.

Two of the petitions which will be filed, call for the cementing of the road beginning at the end of the Frank Green et al cement highway, northeast of the city, and winding around through the northeastern part of the county until they reach the county line. One of the routes is through Mays and the other through Raleigh, touching the county line at Lewisville. It is claimed by the farmers circulating each of these petitions that their routes are the shortest to Newcastle.

The third petition which will be presented is for a road which begins at the Jackson township line where the John H. Powers cement road will leave off, runs north to the north end of Hal Green's farm, jogs east a short distance and thence north to the county line without passing through Mays.

It is also reported that a petition is being circulated in Orange township to join up the Lafayette Peck pike, which has not yet been built, with the Milroy pike.

ONE KILLED; SIX HURT

Terre Haute, Ind., Mar. 28.—One woman was killed and 6 persons were hurt here last night when a South Seventh street car crashed into an automobile, which was driven by John M. Manson, secretary of the Deep Vein Coal Company of this city.

WHIPPET TANK TO BE SEEN HERE

One of Three to Tour State in In-
terest of Victory Loan Coming
to Rushville April 18

TO TRAVEL UNDER OWN POWER

Jackies Band and Airplane, if Suit-
able Field Can be Found, Are
Also Promised County

Loan Workers To Meet

A meeting of township Victory Liberty Loan workers, both men and women, has been called for the court house at two o'clock next Tuesday afternoon to arrange for the campaign which opens April 21. The first-advertising for the campaign, the "teaser posters," has been received here and was being distributed today. The poster is a big "V" on a background of red, 20 by 30 inches in size.

With whippet tanks crawling from county seat to county seat, and in full battle array, with airplanes soaring over-head, with the Jackies band entour and with men in khaki explaining that "the job is not over" until the last debt has been paid, and the last soldier brought home, and the government's slate of obligations wiped clean, Indiana will take on a truly military atmosphere during the next thirty days. These features have been planned in connection with the Victory loan campaign and will, weather permitting, be staged during the month of April.

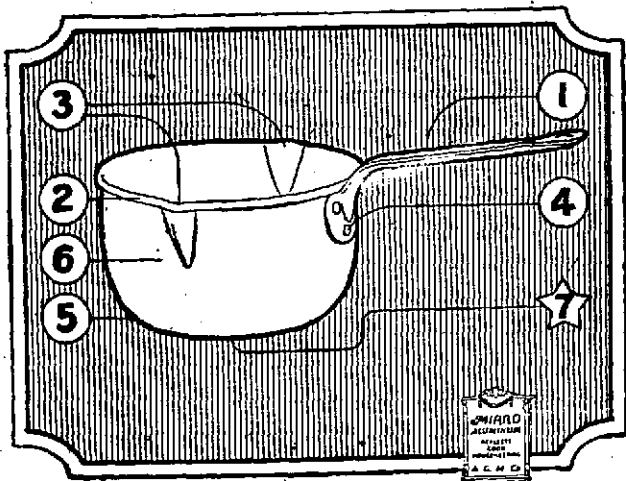

State headquarters of the Victory loan drive is busily engaged in making schedules and itineraries, ascertaining where flying fields, exhibition space and gasoline may be obtained, and in being assured that there is not a city, town, hamlet or even cross roads in the state where Uncle Sam's fighting men will not be extended every courtesy and hospitality the regulations require in connection with these exhibitions. In fact, it is said if the committee should undertake to assign a tank, a flyer, a band, or some other symbol of the recent emergency, wherever a request has been filed, it would involve a complete withdrawal of the American forces abroad. However it is the determined policy of the committee to include every county seat in the sixty-eight counties included in the seventh federal reserve district in the route for the tanks, and as before, send airplanes to those places having adequate facilities to guarantee the safety of a landing.

Each tank will travel under its own power with two operators and a Victory loan speaker. They travel at the rate of five miles an hour and carry enough gasoline for a trip of at least forty miles. The schedule of the tank to cover southern Indiana reveals that it will be here on Friday, Apr. 18, and at Connersville for exhibition the previous day.

The schools will be included in the Victory campaign, with special exercises and instructions now being distributed through the office of the State Superintendent L. N. Hines. There will be the customary avalanche of paid advertising, which will be under the supervision of Geunsey Van Riper of Indianapolis. W. Q. Fitch, of the field force of Purdue university, secretary of the Indiana committee on food production and conservation, which recently staged a state-wide live stock rally in Indianapolis, is expected to take the direction of the farm bureau, at state headquarters, which will give special attention to the proper appeal to the agricultural interests of the state; to continue their whole hearted support of the government's financial program.

Days Pickings

Mrs. Joe Woods of North Harrison street is ill with the influenza.

Mrs. Nora McGinnis and sons, Clifford and Fred have moved from South Harrison street to 416 West First street.

Mrs. Jessie McCauley was operated on at Sexton's hospital yesterday. Her condition is reported to be hopeful.

Bert West of the Marines, who has been spending a furlough with home folks has received word from the authorities at Miami, Florida, to the effect that it is not necessary for him to return to camp, but that his discharge will be forwarded to him soon.

L. B. Smelser, formerly a member of the Rushville high school faculty, is now on the staff of the Tennessee, a Nashville newspaper, according to word received by friends here, and is also studying law. Mr. Smelser was principal of the Frankfort high school after leaving here and later became instructor in public speaking at Wabash college, Crawfordsville, which position he held when he entered the service.

Will Prendergast, formerly of this county, who is employed by the Brooklyn Union Gas company, has sent the Daily Republican an attractive booklet describing the reception accorded the 27th division, New York troops, on its arrival from overseas last Monday. The booklet contains the pictures of New York officials and the reception committee, in addition to the picture of Major General John F. O'Ryan, commander of the 27th. He also forwarded a copy of the Brooklyn Daily Eagle, describing the parade.

IS FINED \$1 AND COSTS.

Bert Moorman was fined \$1 and costs by Squire J. P. Stech yesterday when he pleaded guilty to a charge of assault and battery on Robert Dyer.

Before The Advent Of Woman's Gladness

Women Who Know Take Precaution Against Suffering.

Before the arrival of the Stork, women for over half a century have learned the wisdom of giving nature a helping hand. Nausea, nervousness, bearing-down and stretching pains in the abdomen and muscles are entirely avoided by the use of Mother's Friend, according to the testimony of thousands of mothers who have used this time-honored remedy. Mother's Friend lubricates the fine network of nerves beneath the skin, and by regular use during the period the muscles are made and kept soft and elastic. They can then expand gently and easily when baby is born and pain and danger at the crisis is naturally avoided. Mother's Friend is a preparation of penetrating oils and other medicinal agents prepared especially for expectant mothers. It is for external use, is absolutely safe and should be used regularly during the entire period before baby comes. Write to the Bradford Regulator Company, Dept. A, Lamar Building, Atlanta, Georgia, for an interesting Motherhood Book and obtain a bottle of Mother's Friend from the druggist. You will find it the greatest kind of help.

—The Misses Gladys Downs and Fern Myers of Milroy visited friends here last evening.

—Will Louden of near Arlington made a business trip to Indianapolis this morning.

—Denny Ryan is spending a few days in Chicago, where he is the guest of relatives.

—Roy Abercrombie went to Indianapolis this morning and will attend a meeting of the Shriners tonight.

—Mrs. Ira McNamara will return Saturday to her home here at

—Mrs. Wilbur Smith is visiting Mr. and Mrs. Harry Hickey of Milroy for a few days.

—Wm Hite of near Clarksburg was among the Indianapolis business visitors today.

—Ed Austen of near Andersonville was a business visitor here yesterday afternoon.

—Miss Frances Neutzenhelzer will see the "Follies" at the English theatre in Indianapolis tonight.

—Mrs. Nick Lecker of near Milroy and Mrs. James Parker of Williamstown were the guests of Mr. and Mrs. Eli Hardwick and family today.

—Mr. and Mrs. Will Amos of near this city motored to Indianapolis this morning and will attend the meeting of the Shriners tonight at the Murat temple.

New York Music Teacher

Says "Vinol Cures Chronic Coughs"

New York City, 121 Nicholas Avenue.—"I teach piano and singing and when suffering from chronic coughs, colds and bronchitis, I use Vinol as I find it cures when other remedies fail."—Henry Albers.

The reason Vinol is so successful in such conditions, is because it is a constitutional remedy containing beef and cod liver peptones, iron and manganese peptones and glycerophosphates. It strengthens and revitalizes the entire system and assists nature to expel the disease.

We know of many such cases. F. B. Johnson & Co., Druggists and Druggists Everywhere.

P. S.—If you have skin trouble try Saxol Salve. Money back if it fails.—(Adv.)

Na-tu-ra

Is the crowning achievement of the First Century of The Hoosier State For the treatment of all forms of CATARRH.

Thousands of the best citizens of the state of Indiana have used NATURA and attest to its merits of efficiency. No more dependable people live than those of your own Home State.

J. M. Barr, Blountsville, Ind., says: I have been afflicted with catarrh for the past Forty Years. I had been in poor health for several years. I had a very bad case of stomach trouble. After eating I would often bloat until I was in distress. My kidneys were badly affected and I had rheumatism; also had enlargement of the prostate gland. Soon after I began using NATURA I began to improve as I quit bloating which was a great relief to me. I have now used nine bottles of NATURA. It has benefitted me more than all other medicines I ever used. My health is better than it has been in years. The money I spent for NATURA is the best investment I ever made.

HOW TO PLAN, LOCATE HOME FOOD GARDENS

The farmer generally selects the
choicest plot of ground on the farm
for his vegetable garden, and no
pains are spared to make the land
rich and productive. The city or
village gardener, on the other hand,
has little or no choice as to the
character of the soil or its location.
It is a question with him of taking
the available land and doing the best
he can with it. The land at his dis-
posal often is shaded during a por-
tion of the day, and the soil fre-
quently consists of hard clay, re-
fuse accumulated from building op-
erations, or materials that have been
dumped upon the land. It is possi-
ble, however, to grow many of the
garden vegetables under adverse
conditions. Results obtained by
many city gardeners during the past
two years are considered truly re-
markable by specialists of the Uni-
ted States Department of Agricul-
ture.

In casting about for a location
for the garden, the back yard or
home plot should be given first con-
sideration, the specialists say. As a
general rule, a location near the
house is most desirable. In the first
place, if the garden is near, it can
be worked during short periods, of

available time; then, it is more con-
venient for gathering the vegetables
as they are wanted for use; and fi-
nally, the garden can be better pro-
tected from molestation.

If the back yard or other ground
near the dwelling is too small, is

U.S. DEPARTMENT OF AGRICULTURE

shaded during a considerable por-
tion of the day, or if the soil is of
such a character that vegetables
cannot be grown upon it, the use of
a vacant lot in the neighborhood is
recommended. Where no land is
available in the immediate vicinity of
the home, community gardens locat-
ed in the other part of the city have
proved satisfactory.

There is a decided advantage in
working upon one's own land, as the
soil improves from year to year by
fertilization and cultivation, and the
best results can be secured where
the use of the land is assured for a
period of years.

Don't plant a garden where the
sun does not shine for at least five
hours each bright day. Don't locate
the garden on soil that is so thin and
where the rocks are so near the sur-
face that the garden will burn out
during the summer. Don't attempt
to grow a garden on land that is
more cinders and rock than soil.
Don't plant a garden under or near
large trees that will not only shade
the crops, but, in addition, draw all
the moisture and plant food from the
soil. Don't plant a garden on land
that overflows.

The ideal garden spot is seldom
found but it is often possible to find
a location that embodies the more
important points and then to supply
the others.

A definite plan for the garden
should be drawn on paper before any
planting is done. First, determine
the exact dimensions of the avail-
able land; then ascertain which
parts of the garden will be best
adapted to certain crops, especially
those that require a large amount of
sunshine. Outline the garden plan

on paper, and sketch in the crops
that are to be planted upon each
part.

In planning the garden it should
be borne in mind that certain crops,
such as lettuce, radishes, and early
beets can frequently be grown in the
same rows with other crops and be
removed before the main crop at-
tains sufficient size to require the
entire space. It should also be re-
membered that carrots, beets, galsi-
fy, early turnips, parsnips, and all
crops of that type may be grown in
rows 12 to 18 inches apart and will

require less space than for exposure to the
sunshine.

Due consideration should be given
to both companion and succession
cropping. By companion cropping,
the plan of planting two or more
crops together and removing those
that mature first is followed. By
succession cropping, one crop fol-
lows another, keeping the land fully
occupied all the time. Thus, early
cabbage may be followed by turnips
late beans, late beets, or late cab-
bage. The arrangement of crops,

however, depends somewhat upon
the locality and length of the sea-
son.

Detailed directions for locating
and planning gardens are contained
in free bulletins of the United States
Department of Agriculture, which
will be sent upon application to the
Department.

105 LB. TOURNAMENT OPENS

Rushville Among the Strong Con-
tenders For the Trophy

Newcastle, Ind., March 28.—Jun-
ior basket tossers from all over the
state came to Newcastle today to
participate in the state junior 105-
pound basketball tourney which
opens here today. The tourney con-
tinues through tomorrow.

Trophies are ready for the victor
of the tourney and after it is end-
ed a banquet will be tendered the
champions. Strong contenders en-
tered are Muncie, Anderson, Marion
and Rushville. Thirty-two teams
asked to be entered but the best
were chosen.

DIRECT COST OF WAR

London, March 28.—Edgar Cram-
mond, British financial writer,
places the total direct cost of the
war to the allies at £28,360,000,000
(\$141,800,000,000), and to the cen-
tral European powers at £13,675,-
000,000.

The 1919 Wheat Crop

If weather conditions in this country are favorable there will be a record wheat crop in 1919. And every bushel of this wheat under the government guarantee will bring the farmer \$2.26.

This guarantee has back of it an appropriation of a billion dollars made by congress for the purpose of supporting the wheat price.

It is possible that the loss to the government may not be as great as anticipated. Mr. Hoover informs us that Europe will need more wheat than the estimates have called for. There will be no wheat raised in Russia, Serbia or Bulgaria, so these countries, which are usually exporters, will be obliged to import wheat. The crop will not exceed the usual amount.

These conditions may force up the market price of wheat and relieve the pockets of Messrs. Taxpayer & Co. As the pockets of Taxpayer & Co. are not especially full at present, such a result would be a welcome one.

PIMPLY? WELL, DON'T BE!

People Notice It. Drive Them Off with Dr. Edwards' Olive Tablets

A pimply face will not embarrass you much longer if you get a package of Dr. Edwards' Olive Tablets. The skin should begin to clear after you have taken the tablets a few nights.

Cleanse the blood, the bowels and the liver with Dr. Edwards' Olive Tablets, the successful substitute for calomel; there's never any sickness or pain after taking them. Dr. Edwards' Olive Tablets do that which calomel does, and just as effectively, but their action is gentle and safe instead of severe and irritating.

No one who takes Olive Tablets is ever cursed with "a dark brown taste," a bad breath, a dull, listless, "no good" feeling, constipation, torpid liver, bad disposition or pimply face.

Dr. Edwards' Olive Tablets are a purely vegetable compound mixed with olive oil; you will know them by their olive color.

Dr. Edwards spent years among patients afflicted with liver and bowel complaints, and Olive Tablets are the immensely effective result.

Take one or two nightly for a week. See how much better you feel and look. 10c and 25c per box. All druggists.

"We're As Near As the Nearest Phone"

Quality Flowers

Our name is a guarantee that the flowers you order here are always beautiful and fragrant—freshly cut—the long lasting kind.

Perhaps you don't know, but we have 45,000 square feet of modern glass from which to cut our stock from, and we can always, day or night, supply you with something in this line. Our place is never closed if your need is pressing and time is limited.

"Say it with Flowers"

Glenn E. Moore

EAST SIXTH ST. FLORIST PHONE 1489

The idea of enforcing a peace is too good to be a mere idea. It deserves to be a fact.

It is more likely to be one if we avoid pipe-dreams. If we recognize its numerous imperfections and the prospect of complete breakdown—the scarier will its imperfections—and breakdowns—become.

And here is one little circumstance. Hardly anything has been said about the relationship of the signatories if one or more of them indulged in a revolution. Are the rest of them still bound by their signatures?

If, for example, Italy turns bolshevist, and selects an Italian Trotsky and Lenin. Are the other nations bound by promises made to the present Italian government?

Or if the majority of the powers turn bolshevist (which is not at all improbable) is America bound to accept that majority's ruling and co-operate with it in a series of comic escapades resembling the daily program in Russia? Bedlam might break loose among the preponderating members of the league and what would become of the intelligent minority?

Let us pray that in signing this document we make such reservations as we need for our protection. Let us, for example, define with absolute precision the interpretation of its terms if a responsible foreign government is superseded by a non-descript aggregation of circus clowns.

It is supremely desirable that all nations sign it. Most of them will be prepared, if necessary, to put their own construction on the letter of its provisions.

Theodore Roosevelt's personality is no longer among us, but his "soul" will go marching on among Americans present and to come.

Uncle Sam's troubles in the peace conference are not concerned with boundaries and indemnities. He only wants to get his boys home and to "live happy ever after".

Great Britain is planning the development of aircraft for conveying passengers, mail and freight. It is stated that by this means the London mail could be conveyed to Calcutta in four days as against sixteen, the minimum at present.

At present corn is going down, and it will be some time at that before a new crop is coming up.

TO CONTINUE LOCAL BOARDS

Indianapolis, Ind., Mar. 28.—In order to maintain a "barometer" of changing labor conditions, the United States Employment Service today announced that the service of Community Labor Boards would be continued indefinitely. A demand for information as to the unemployment situation the country over, it is said, influenced the decision to continue weekly bulletins from the Service to large employers, public officials and others interested.

By HERT MOSES

No one will believe in you until you believe in yourself.

A low price and a bargain are radically different propositions.

Girls admire heroes who heave sighs more than heroes who heave bricks.

A kick from the rear does not rank so high in reform tactics as a pat on the back.

One-half of the world thinks the other half is trying to steal its money—and quite often it is.

Hez Heck says: "Most men think they could improve the weather if the Creator would only put them in charge of it."

You cannot judge a watch by its case, a book by its binding or a woman by her apparel. The things that don't show are what determine value.

Amusements

+++++

Harry Carey at Mystic

Harry Carey in "Hell Bent," is the offering at the Mystic theatre tonight. Saturday Bessie Eytan in "The Convert of the North," is to be shown and three good comedies, "Tobin's Palm," "Check Your Hat" and "The Dismissal of Phil," are also on the program.

Griffith Picture Repeated

D. W. Griffith's special production, "The Greatest Thing in Life," is being shown for the last time at the Princess theatre tonight.

It is a remarkable battle scene. No printed words can adequately describe this curtain of fire under the protection of which our Yank boys have repeatedly marched into the Hun trenches. You can see the heavy smoke clouds sweeping forward as though by the force of some unseen giant hand moving steadily toward the enemy trenches on a hill crest. You can see the shells exploding. It is so vivid that you can almost hear the crash.

Through the curtain of cloud a bombing aeroplane takes its perilous flight: now up almost in the real clouds; now darting like an angry wasp through the smoke and reek of the battle, just above the trenches.

The creeping barrage is a development of this war. Before the days of such intensive artillery fire such a tactical device was never dreamed of. This is the first visualization available to those at home.

Saturday Harry Morey in "Hoarded Assets," and also a Sunshine comedy "The Son of a Hun" is the offering.

CLARENCE MYERS IS BACK

Is Confined to Hospital at Portsmouth With Pneumonia

According to a letter received by Mr. and Mrs. Charles Harton of Milroy from Clarence Myers, he has safely arrived from overseas and is now stationed in a hospital at Portsmouth, Va. He arrived there about two weeks ago and since that time has been confined to the hospital from an attack of influenza-pneumonia which he contracted while coming from France. Private Myers was in France for eighteen months, having been gassed and also

wounded in the side with a machine gun bullet. Meyers enlisted early in 1917 with the marines while employed at Will G. Mulno's clothing store here.

CARTOONIST PLEASES

Despite bad weather and the increasing sickness in the community, a fairly large audience greeted Ash Davis, noted cartoonist and lecturer, in the third number of the lecture course at the Arlington M. E. church Wednesday night. His breezy, running conversation combined with his cartoons and pictures, which were perfect gems of art delighted the audience.

WEAKNESS REMAINS LONG AFTER Influenza

Reports Show That Strength, Energy and Ambition Return Very Slowly to Grippe Patients.

After an attack of influenza, doctors advise that nature be assisted in its building-up process by the use of a good tonic—one that will not only put strength and endurance into the body, but will also help to build up and strengthen the run-down cells of the brain.

One of the most highly recommended remedies to put energy into both body and brain is Bio-feren—your physician knows the formula—it is printed below.

There's iron in Bio-feren—the kind of iron that makes red blood corpuscles and creates vigor. There is lecithin also; probably the best brain invigorator known to science. Then there is good old reliable gentian, that brings back your lagging appetite.

There are other ingredients that help to promote good health, as you can see by reading this formula, not forgetting kolo, that great agent that puts the power of endurance into weak people.

Taken altogether Bio-feren is a splendid active tonic that will greatly help any weak, run-down person to regain normal strength, energy, ambition and endurance.

Bio-feren is sold by all reliable druggists and is inexpensive. For weakness after influenza patients are advised to take two tablets after each meal and one at bed time—seven a day, until health, strength and vigor are fully restored.

It will not fail to help you and if for any reason you are dissatisfied with results your druggist is authorized to return your money, upon request—without any red tape of any kind.

Note to physicians: There is no secret about the formula of Bio-feren. It is printed on every package. Here it is: Lecithin, Calcium, Iron, Phosphate, Iron Peptonate, Manganese Peptonate, Ext. Nutrient, Powdered Gentian, Potassium Iodide, Oleanin, Capsicum, etc.

There won't be enough Fordson Tractors to go 'round!

THE demand for the Fordson tractor is so great that it will be a long time probably before everyone will be able to get one. Therefore, if you are looking for a tractor and wish a Fordson you should see us at once.

The Fordson has more than fulfilled expectations. With its economy—efficiency—durability—it is ideal for the average farm.

Burns kerosene—has special air washer—and all moving parts are enclosed—there is practically nothing to cause trouble.

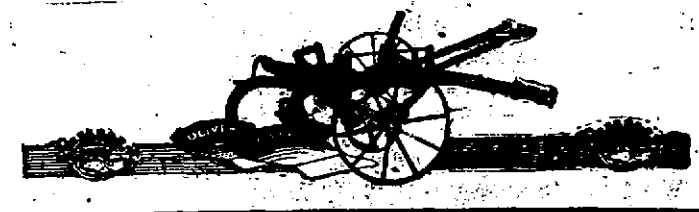

Use it with the Oliver No. 7 Plow

Here are some of the big Oliver features: The combined rolling coupler and jointer buries all stalks, weeds and trash at the bottom of the furrow; and the stop device maintains an even depth of furrow. The best plow for your Fordson—that's the Oliver.

Come in and let us show them to you.

Make This Test For Acid-Stomach

There are millions of people who suffer almost daily from the horrors of an acid-stomach—indigestion; sour, gassy, stomach; distressing heart-burn; sickening food-repeating; painful bloating and that miserable, puffed up, lumpy feeling after eating. Many of these people have tried treatment after treatment; medicine after medicine; others have gone to doctors and stomach specialists and some to hospitals but in spite of all of their efforts they have obtained no lasting relief or a permanent cure.

These symptoms simply mean acid-stomach. If allowed to run on, they are very likely to cause a lot of serious trouble. Dyspepsia, rheumatism, gout, lumbago, sciatica, splitting headache, dizzy spells, nervousness, sleeplessness, mental depression, melancholia, a feeling of listlessness and all-goneness—these are just a few of the disorders which can be traced to acid-stomach. As a matter of fact, acid-stomach is often the direct cause of those almost incurable conditions known as catarrh of the stomach, intestinal ulcer, and cancer of the stomach. The lives of those who suffer from these serious troubles are nothing short of daily agony. Surely, then, you must see how important it is to go at once to the seat of the trouble—acid-stomach. You know what acid-

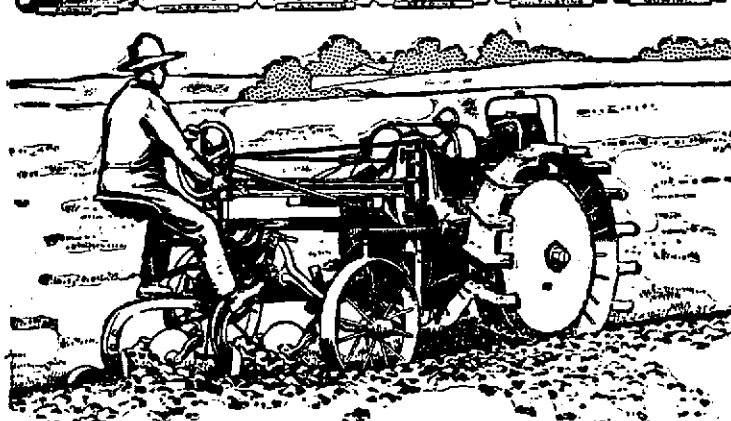

mouth does to the teeth—how it eats right through the hard enamel and causes them to decay. Think then of the havoc that must be caused by excess acid in the stomach!

Even if you are not suffering any immediate stomach pains, but are not feeling just as fit and fine as you should, you should by all means make this test: go to your drug store at once and get a big box of EATONIC. It is in the form of pleasant-tasting tablets—you eat them like a bit of candy. EATONIC is prepared for just one purpose—correcting acid-stomach by driving out the excess acid. EATONIC literally absorbs the excess acid. It brings instant relief from the pains of indigestion, heartburn, belching, sour, gassy stomach, bloating, etc. It makes the stomach pure, sweet, cool and comfortable, puts it in a normal, healthy condition, so that your food is properly digested. You need every bit of strength you can possibly get out of the food you eat—and EATONIC helps you get it.

Don't put this test off if you value your future good health and happiness. You run no chance at all because EATONIC is absolutely guaranteed to give you relief or your druggist will refund your money. The cost is a mere trifle.

EATONIC FOR YOUR ACID-STOMACH

ONE MAN OPERATES BOTH TRACTOR AND IMPLEMENT

MOLINE UNIVERSAL TRACTOR

It Solves The Farm Help Problem

With two 14-inch bottoms, under average plowing conditions, the new Moline Universal Tractor, Model D, plows 9 acres in 10 hours, as much as ordinary 3-plow machine. The superior efficiency of the Moline Universal is due to its higher speed, 3 1/2 miles an hour, two bottoms at 3 1/2 miles giving the same number of plow-miles as three bottoms at 2 1/4 miles.

Plowing at 3 1/2 miles an hour gives ideal results, the ground being pulverized more thoroughly than at slower speeds, with less air space. Tough sod that cannot be turned at all at 2 1/2 miles an hour is plowed with ease.

Perfect work is assured with the Moline Universal through the advantageous position of the operator, who sits on the implement, where he must sit in order to do good work. The Moline Universal is easily handled, turns short, and backs as readily as it goes forward.

Waste of time in the field is eliminated and the tractor kept at productive work a maximum number of hours a day through a complete electric starting and lighting system. The Moline Universal is the only tractor thus regularly equipped.

The secret of the speed and power of the Moline Universal lies in its perfected overhead-valve engine and two-wheel construction. The engine develops 18 horsepower at the belt, and 9 at the drawbar, every ounce of which is available for pull. There are no dead wheels to drag along that only carry weight and steer.

For plowing in extremely soft ground, the Moline Universal is equipped with a differential lock that enables the two drive wheels to be locked together, doubling their pulling power.

When plowing the land wheel is raised so that the tractor is level. The wheel is very easily and quickly raised or lowered.

The light weight of the Moline Universal, 3350 pounds, and its high clearance, 29 1/2 inches, make it adapted for all other field work, besides plowing. With it one man can plant 40 acres a day, cultivate 20 acres a day, harvest 25 acres a day, or do any other work with equal speed. It is the ideal tractor for any sized farm, practically eliminating horses and solving the farm help problem.

Call and let us show you this remarkable machine.

Church: Sunday school at 9:30 a. m.; at 10:30 the pastor will administer the sacrament of the Holy Baptism to a large class and receive new members into the church; Junior Epworth League at 2:30 p. m.; Epworth League service at 7 o'clock. At 8 o'clock Joseph Saylor Black will present an organ recital, assisted by Mrs. George Hoggsett and Prof. Charles Ernest Parke. Everybody is cordially invited to attend all these services.

FRANK CAMERON RETURNS

Mrs. Nelle Cameron of Milroy has received a telegram to the effect that her husband, Frank Cameron, has arrived from France, according to a report received here, and is now at Newport News, Va. Mr. Cameron was overseas nine months, serving with the One Hundred and Thirty-Sixth Field Artillery.

Children smile when they take

FOLEY'S HONEY-TAR

1st. It tastes good.
2nd. It makes them feel good.
3rd. It will turn a distressed, fretful child into a happily smiling one.
Because it is just what children ought to have for feverish colds, coughs, croup, "nauseas" and heavy, wheezy breathing. It puts a healing, soothing coating on a feverish, inflamed, tickling throat, and it stops coughs quickly. It is good for croup, whooping cough, measles, scarlet fever, diphtheria, and other diseases that you would not like to give to young children, and it is just as effective for grown-ups.

F. B. JOHNSON

EFFECT MARCH 30

Clocks Throughout the Nation Will be Turned Ahead One Hour Next Sunday Morning

GIVES MORE DAYLIGHT HOURS

Railroads Schedules to Remain the Same, Though Few Trains May be Held at Terminal for Hour

The daylight saving schedule which was followed last summer for the first time in the United States, will again go into effect at 2 o'clock Sunday morning March 30. It appears that there was some dispute as to the exact hour when the clocks will be moved forward one hour, but according to the best information obtainable here the change will be made two hours after midnight Saturday.

The confusion as to the date is due to the wording and the evident intent of the law providing for the new schedule which was passed by the congress in the early spring of 1918. The law provides that the change shall be made on March 31 at 2 a. m., but was enacted with particular reference to 1918. The date was fixed because last year March 31 came on Sunday, but this year March 31 falls on Monday. However, it is the evident intent of congress to make the change on Sunday.

It is known that congress intended to make some changes in the daylight saving law, and probably repeal it altogether, but the filibuster which was staged during the closing hours of the session prevented any discussion of the law. As a result the former law stands as it was enacted in 1918.

The clocks are changed on Sunday morning because of convenience for the railroads. There are fewer trains operated on Sunday morning than at any other time of the week. The local railroad offices have received official word that the clocks will be moved forward at 2 o'clock Sunday morning, so it is known that the railroads will follow the new schedule after that time, regardless of what others may do. However, in view of the fact that the public is inclined to adopt the same time that the railroads do it is expected that the change will be made throughout the country at that hour.

The daylight saving plan is not as popular in rural communities as it is in the industrial centers. Many of the factories here begin work at 7 o'clock which under the new schedule means 6 a. m. Instead of quilting work at 6 o'clock in the afternoon, the are relieved at 5 o'clock. It is this feature that appeals to many people, especially to those who tend their own gardens, as it gives them another hour after working time to look after their gardens.

It really makes little difference to farmers during the summer months what time the clock may show as they work from early morning to late at night in order to take care of the large amount of work that must be done at that season of the year. However, the majority of farmers would prefer the standard time to the new daylight saving hours as a matter of convenience when they leave the farm.

The change in time will be made as it was last year and no difficulty is anticipated. Most of the trains that are due to leave their terminals about midnight will be held for one hour so that they will reach their destinations as shown by the revised schedule.

TO FIGHT FOR FIGHTERS

(By United Press.)

San Francisco, Mar. 28.—Fred Fulton and Jeff Clark, the "fighting ghost," will be the headliners tonight at a boxing card arranged by the police department for the benefit of returning soldiers and sailors.

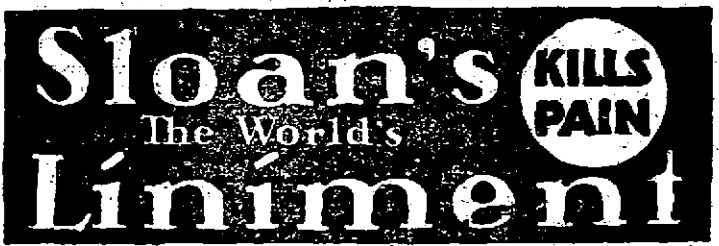

RICHMOND HERO HONORED

Richmond, Ind., March 28.—Corporal George H. Gibbs of Richmond, a member of the 148th Infantry, has been awarded the French Croix De Guerre for conspicuous bravery in action against the Huns.

YOUR TIRED, STRAINED MUSCLES

When your muscles become tired and swollen and the joints become stiff, your circulation poor, and your suffering makes you irritable, an application of Sloan's Liniment gives you quick relief—kills pain, starts up a good circulation, relieves congestion. It is easier and cleaner to use than musky plasters or ointments, acts quickly and does not clog the pores. It does not stain the skin.

For sprains, strains, bruises, "black and blue" spots, Sloan's Liniment reduces the pain and eases the soreness. Certainly fine for rheumatism, stiff neck, sciatica, lame back, toothache. You don't need to rub—it penetrates. Its use is so universal that you'll consider Sloan's Liniment a friend of the whole family. Generous size bottles at druggists everywhere.

The Long and the Short of It

Any battery will be short lived unless it is properly cared for.

Willard Bone-Dry Batteries are unusually long-lived where the few simple rules of battery care that apply to all batteries, are followed.

Rule 1—Add distilled water every week or two to each cell, so that level-of solution is always 1/2 inch above plates.

Rule 2—Keep battery fully charged.

Rule 3—Don't overheat your battery.

Of course there are other rules, too, that will help you to get the most out of your battery. Drive around this way and let us tell you about them in detail.

R. E. (Dick) Abernathy

The Royal Neighbors will have a
called meeting Monday night in the
Modern Woodmen hall in West Third
street. All members are urged to be
present.

About thirty-five couples attend-
ed the dance last evening given in
the Modern Woodmen hall, in West
Third street. The Greensburg jazz
orchestra furnished the music for
the evening. Only a few out-of-town
guests were present.

Members of Mrs. Jesse Bennett's
Bible class of the First Presbyter-
ian church were entertained yester-
day afternoon by Mrs. J. R. Car-
michael at her home in North Main
street. The afternoon was devoted
to a brief business session after
which a social hour followed.

The Misses Nora and Mary
Sleeth were hostesses for the
Shakespeare club last evening at
their home in West First street. At

the meeting, the members of the
anna university, delivered a lecture
on "Russia," which proved to be one
of the most interesting talks of the
series of lectures he has given be-
fore the club.

Mrs. Charles Mohler and daughter
gave a miscellaneous shower at
their home near Mays yesterday af-
ternoon, honoring Mrs. Thomas
Heck, who was recently married.
Mrs. Heck, formerly Miss Lon Cald-
well, received many beautiful and
useful presents. The afternoon was
spent socially and dainty refresh-
ments were served by the hostesses.

One of the pretty social events of
the season was the Auction Bridge
party given by Miss Bertha Helm
yesterday afternoon at the home of
Mrs. A. L. Gary in North Harrison
street. The spacious rooms, where
the nine card tables were arranged,
were beautifully decorated with
clusters of cut flowers. The guests
enjoyed the afternoon playing
cards, after which a delicious six
o'clock dinner was served to the
many guests.

Eighteen members of the Daugh-
ters of the American Revolution met
yesterday afternoon at the home of
Miss Emma Cassady in North Mor-
gan street. After a short business
session, an interesting program was
given, during which time Mrs. Ho-
mer Bell of Huntington, West Vir-
ginia, gave several musical selec-
tions. Mrs. Bell and Mrs. E. A.
Strong of Indianapolis were the
out-of-town guests. Light refresh-
ments were served late in the after-
noon.

Miss Doris Saxon was the hostess
for the Priscilla Art Club yesterday
afternoon at her home east of Fair-

JURY DISAGREES IN HUTCHERSON CASE

Fails to Reach Verdict in \$500 Dam-
age Suit Against the City and is
Discharged.

The jury in the case of Grover
Hutcherson against the city of
Rushville, for \$500 damages alleged
to have been sustained when the
plaintiff ran into a traffic post at the
corner of Morgan and Second
streets with his automobile, March
20, 1918, disagreed and was dis-
charged about 5:30 o'clock yester-
day evening. The jury, which re-
ceived the case about 10 o'clock
yesterday morning, was reported to
have been evenly divided most of the
time. Some jurymen favored giving
Hutcherson damages, it is said.

The case of the Standard Oil
company against Reinheimer and
Capp, on an account for \$2,300,
which was set for trial today, was
sent to Hancock county on change
of venue, on motion of the defend-
ants. A deputy of the state attorney
general has entered an appearance
for the defense in the habeas cor-
pus proceedings of W. A. McDonald
against Luther Short, superintendent,
and the trustees of the Sol-
diers' and Sailors' Orphans' home,
to recover his children who are in
the home. The defendant has filed an
offer to confess judgment in the
case of Arthur B. Hall against Har-
ry M. Arnold on an account for
\$550.

COMES HOME ON CRUTCHES

Relatives of Sergt. Ralph Wagon-
er received word from him today to
the effect that he has safely arrived
in New York after spending nearly
nine months in France. Sergt. Wag-
oner came over on a hospital ship,
having been suffering from broken
arches. Word was also received from
the captain stating that Sergt. Wag-
oner would be sent on home for
treatment but would not be dis-
charged until he was physically fit
as it would be necessary for him to
use crutches for some time.

Marconi Wireless Experts are Making a Series of Investigations Which are Successful.

THOUGHT IT WASN'T POSSIBLE

But Plans are Under Way to Install a Wireless System From New York to London.

(By United Press.)

New York, Mar. 28.—"Hello! Hello! Is this New York? Yes? Well, how's every little thing along Broadway?"

"Ah, hello there, cousin! How's dear Old London?"

A telephonic conversation between London and New York? Yes, certainly. And at no very far distant date, either.

At least, that's what the Marconi wireless experts are saying in New York. And they ought to know—for the experts have been making some very exhaustive experiments.

Roy A. Weagant, Marconi's chief engineer, announced shortly after the armistice was signed that his new discovery would quite eliminate the interference of static electricity from radio-graphic currents. At first the scientific world was skeptical. They didn't think it could be done.

Nevertheless, Weagant was correct in his deductions, according to the Marconi company, and as a result plans already are under way for the installation of a wireless telephone system between New York and London.

Statics, or "strays" as they are known in the bewildering language of the wireless experts, are loose, uncontrolled electrical elements. Weagant told the members of the New York Electrical Society, and these statics stray into the wireless messages sent through the air. They cause such a din at times that the messages are drowned. He has discovered the natural law which causes statics to travel in a vertical path. Weagant added, while the two links of a radio message take a path parallel with the earth.

Weagant's discovery makes it possible to catch the statics going one way and the wireless wave going at right angles. In this way the two are kept from coming into contact and practically all of the trouble is thus eliminated.

In commenting upon the discovery Marconi officials said that the elimination of atmospheric interference perfects the wireless to such a degree that transatlantic telephony is a comparatively simple matter. As a result, the wireless telephone will soon conquer the ocean, the experts maintain, and the human voice speaking in New York, will quickly find an echo in London.

Wasn't it S. F. B. Morse who asked, "What hath God wrought?"

AFTER CLOUDS COMES SUNSHINE.
AFTER DESPONDENCY COMES JOY.
AFTER SICKNESS COMES HEALTH.
AFTER WEAKNESS COMES STRENGTH.

In the spring when you're "all in"—fagged out—blood thin, if you will turn to Nature's remedy, a tonic made from wild roots and barks, which has stood fifty years as the best spring tonic—you will find strength regained. COLLEGE STUDENTS LEARN AVIATION

Division of Military Aeronautics Prepares Course for Training Fliers

GRADUATE IN THREE YEARS

Will Then be Prepared for Sport, Military or Commercial Aerial Duties

(By United Press.)

New York, Mar. 28.—Paving the way for future commercial aerial activities and at the same time making ready an air force for military needs, the Division of Military Aeronautics has arranged a training program for college students which will not interfere with their prescribed college courses but will, at the end of three years turn them out prepared for commercial, sport or military aviation duties.

The plan, as announced by the War Department, in connection with its Exhibit at the Aeronautical Exposition here, permits the college student to absorb the courses previously included in the curriculum of the ground schools while working for his degree.

The assumption of the War Department is that aviators must be young men, and they point to the experience of the war to prove their point. For this reason, they say, there must be a constant stream of candidates going through the schools.

The government's detailed plan as explained at the Aeronautical Exposition by Colonel B. E. Castle formerly of the Control Board, Division of Military Aeronautics, is as follows:

"We are proceeding on the assumption that aviators will become superannuated more rapidly than any other kind of officer, so that it is imperative that the supply of trained personnel be kept up. In view of the strength of the air service at the

cessation of hostilities and in view of the depreciation among our reserve officers of not less than ten per cent a year, it is estimated that we must draw about 1,000 pilots, 850 airplane and balloon observers, and 100 engineer officers every year.

"In order not to take the better part of a year of a man's time to train him as a pilot or observer, the machinery of the Reserve Officers' Training Corps was chosen as most likely to bring about desired results.

"In outline the plan is to give the equivalent of the work formerly done in the ground schools exclusive of military practice—that is, airplanes, engines, gunnery, navigation and maps, infantry and artillery co-operation, and signalling—at the college and universities during the college year and give flying and military training during the six weeks summer camps held at northern flying fields.

Everything possible will be done to cultivate a high esprit de corps among the candidates by general lectures on the achievements of Air Service and by the fostering of sports and games as a part of the curriculum."

CAPITOL SHRINERS ENTERTAIN TODAY

Occasion is The Annual Spring Ceremonial Session at the Murat Temple

VISITING SHRINERS THERE

(By United Press.)

Indianapolis, Ind., March 28.—Capital shriners today entertained others of that order at a celebration at the Murat temple here. The occasion was the annual spring ceremonial session.

One of the largest classes of candidates ever advanced in the local order was to be taken "across the desert" at the meeting.

Cincinnati shriners were visiting the celebration and others from all parts of the state were here.

To entertain the visitors a big show was to be given entitled "a Day on the Desert." In this was to be a sand-storm and other features to portray Arabian life.

DEBS ASKS REHEARING

Washington, Mar. 27.—Eugene Debs today filed in the supreme court a petition for a rehearing. The court recently affirmed Debs' conviction under the espionage law, under which he was sentenced to the federal penitentiary.

The Monarch Kruse and Dewenter Annealed Steel Warm Air Furnace

The accompanying cut represents our "MONARCH & PORTABLE FURNACE." This furnace is designed as a strictly first class furnace in every respect and as a portable furnace is superior to any of its kind. It is readily seen from the engraving that the furnace has a very large radiating surface. The radiator is made upon an entirely new plan having reversible flues, the smoke and heat passing through two openings each side and down to the base of the radiator and then back again to the top before entering the smoke flue, thereby preventing a loss of heat. The furnace is constructed throughout of annealed steel plates and is absolutely gas-tight in every part. The fire box is lined with fire clay tile lining. It burns anthracite and soft coal, coke, wood and natural gas. In use over 35 years. Sold and installed by

Walter Perkins

with 22 years of practical experience in warm air heating. Why take a chance on a furnace with a cast iron fire pot installed by some one who knows little or nothing of warm air heating when you can get the best at a less price than you are asked for a cast iron furnace.

Don't Fail to Try It

Pitman & Wilson

LAXATIVE for Aged People

THE BANE of old age is constipation. The bowels become weak and unable to perform their functions without aid. For this purpose only the mildest and gentlest laxative should be used. The use of harsh cathartics aggravates the trouble and makes the constipation worse. Chamberlain's Tablets are a favorite with people of middle age and older on account of their gentle action.

High School Notes

The "flu" has flown from the faculty. All teachers who were out of school last week have returned and are conducting their regular recitations.

□ □

The six weeks grades were given out Monday. They were a week late but better late than never. As usual everyone was "up in the air" over the number of check marks received.

□ □

The Booster Club held a meeting Monday and discussed plans for the dinner to be given to the members of the varsity basketball team. It looks now at the rate there going that the dinner may be given sometime before next Christmas.

□ □

Since Carthage withdrew her representative from the County Contest of the State High School Discussion League, to have been held in Mifflin last evening, George Little, representing Rushville high school, was declared winner by default. The district discussion will be held in Fortville on April 11. The subject this year is "Universal Service for Citizenship" which will be ably discussed by our representative. Last year the district contest was held here and Fortville won over Newcastle.

□ □

The Carpentry class of the high school wishes to carry their ideas and ability into practice. Their plan is to advertise to find a man who wants a garage built. The owner of the garage furnishes the foundation and the lumber and the class under the personal supervision of Mr. Sloan, the instructor, will guarantee satisfaction. The class of twelve boys will build a demountable frame at school and cut and saw all rafters in the shop. Then this material will be taken to the place of erection to be completed. A hip roof is preferred. No competition is desired. For particulars address Mr. Scholl or Mr. Sloan.

□ □

The Junior high school basketball team has been picked as one of the twelve strongest teams which will meet in the tournament at Newcastle Friday and Saturday to decide the state championship of the 107 lb. class.

□ □

Miss Davis was unable to take her classes Thursday y o 2 classes Thursday on account of a severe cold.

U. OF C. GETS BUSY

(By United Press.) Berkeley, Cal., March 28.—If practice makes perfect, the University of California football team should take all Western honors this fall. Coach Andy Smith is already hard at work on the prospects for the next varsity, and strenuous practices are being held three days each week.

IF MOTHERS ONLY KNEW

During these days how many children are complaining of headache, feverishness, stomach troubles and irregular bowels. If mothers only knew what Mother Gray's Sweet Powders would do for their children no family would ever be without them. These powders are so easy and pleasant to take and so effective in their action that mothers who once use them always tell others about them. Sold by druggists everywhere.—(Adv.)

ODD FELLOWS WILL INSTITUTE A LODGE

Arlington Encampment Will be Installed Monday Night by Grand Patriarch Beeler

TO START WITH 75 MEMBERS

A. W. Beeler, grand patriarch of the grand encampment of Odd Fellows, will institute a lodge of the order at Arlington next Monday. The lodge will be known as Arlington Encampment No. 380, I. O. O. F. and starts out very auspiciously with seventy-five charter members. It will meet in the hall of Beech Grove Lodge No. 399, I. O. O. F.

The encampment represents the three higher degrees of the Odd Fellows not included in the subordinate lodges and is a regularly organized body paying benefits and relieving distress wherever found among its members. Most of the social activities of the Odd Fellows is carried out in encampment.

The degree staff of Bernice Encampment No. 12 of this city will confer the three degrees on this class in the evening, beginning at 7:30. A large attendance from here is expected on this account. Several candidates from the local lodge will take the work at the same time. A rehearsal of the staff will be held Saturday night.

DECREASE IN NUMBER OF CASUALTIES TODAY

Total of One Hundred and Ninety-One is Reported by the Commanding General

TWO HOOSIERS IN REPORT

Washington, Mar. 28.—The following list of casualties were reported today by the commanding general of the American Expeditionary Forces: Killed in action, 8; died from wounds, 7; died of disease, 56; died of accident and other causes, 16; wounded severely, 9; wounded slightly, 72; wounded degree undetermined, 22; missing in action, 1; total, 191.

Two Hoosiers were in the report as follows:

Died of disease—Sergt. James Anderson Holloway, Clarksville.

Walter E. Smith

Janesville Tandem Disk Harrow

THE Budlong Harrow is the only harrow we know of in which the bearings do not cramp while the machine is working. This freedom in the bearings means light draft and flexibility in the whole harrow. This allows the Budlong to make use, in a natural way, of all of its penetrating qualities to thoroughly pulverize the soil under the most trying conditions.

The rear harrow is built like a bridge and no manner of hard work will ever force this harrow to buckle in the middle.

**Its Backbone Is as Rigid
as a Concrete Arch**

The trailer steadily holds its place back of the Budlong, whether used on side hills or on the level, on account of the way it is attached to the front harrow.

The same material used in all Janesville machines is found in the Janesville Tandem. Made in sizes from four to ten feet with sixteen-inch blades.

We looked them all over and felt our trade and local conditions would be best served by this Janesville model. Compare notes with us before you buy.

C. H. (Nick) TOMPKINS
